

Informativity on A_V (mutual information under multivariate Gaussian assumption)

Lucas Einig

IRAM - GIPSA-lab

February 20, 2024

Outline

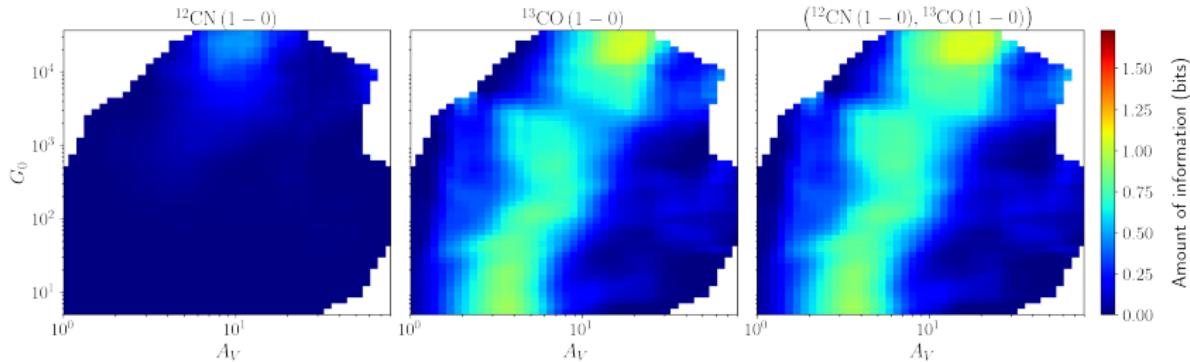

- 1 Combinations including ^{13}CO (1 – 0) (11 available)
- 2 Combinations including ^{12}CO (1 – 0) (11 available)
- 3 Combinations including C^{18}O (1 – 0) (11 available)
- 4 Combinations including ^{32}SO (2 – 1) (11 available)
- 5 Combinations including ^{12}CN (1 – 0) (11 available)
- 6 Combinations including N_2H^+ (1 – 0) (11 available)
- 7 Combinations including CCH (1 – 0) (11 available)
- 8 Combinations including HCO^+ (1 – 0) (11 available)
- 9 Combinations including H_2CO (11 available)
- 10 Combinations including ^{12}CS (2 – 1) (11 available)
- 11 Combinations including HCN (1 – 0) (11 available)
- 12 Combinations including HNC (1 – 0) (11 available)

Outline

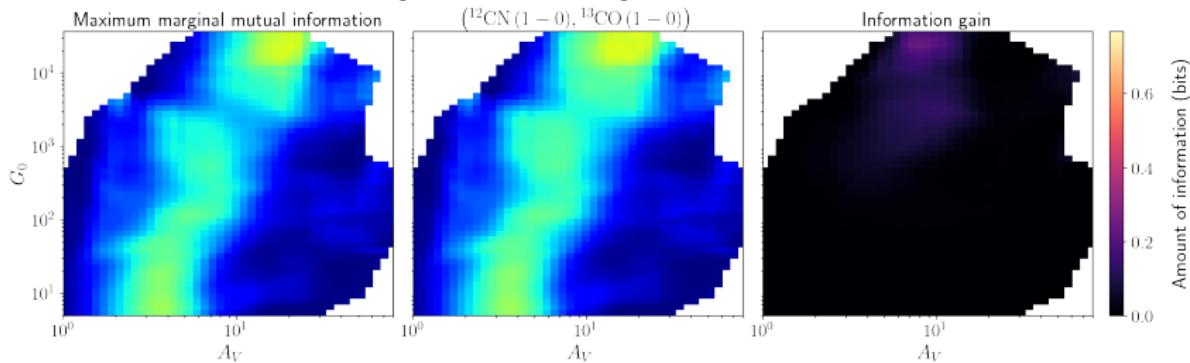

- 1 Combinations including ^{13}CO (1 – 0) (11 available)**
- 2 Combinations including ^{12}CO (1 – 0) (11 available)**
- 3 Combinations including C^{18}O (1 – 0) (11 available)**
- 4 Combinations including ^{32}SO (2 – 1) (11 available)**
- 5 Combinations including ^{12}CN (1 – 0) (11 available)**
- 6 Combinations including N_2H^+ (1 – 0) (11 available)**
- 7 Combinations including CCH (1 – 0) (11 available)**
- 8 Combinations including HCO^+ (1 – 0) (11 available)**
- 9 Combinations including H_2CO (11 available)**
- 10 Combinations including ^{12}CS (2 – 1) (11 available)**
- 11 Combinations including HCN (1 – 0) (11 available)**
- 12 Combinations including HNC (1 – 0) (11 available)**

Informativity on A_V of $(^{12}\text{CN} (1 - 0), ^{13}\text{CO} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

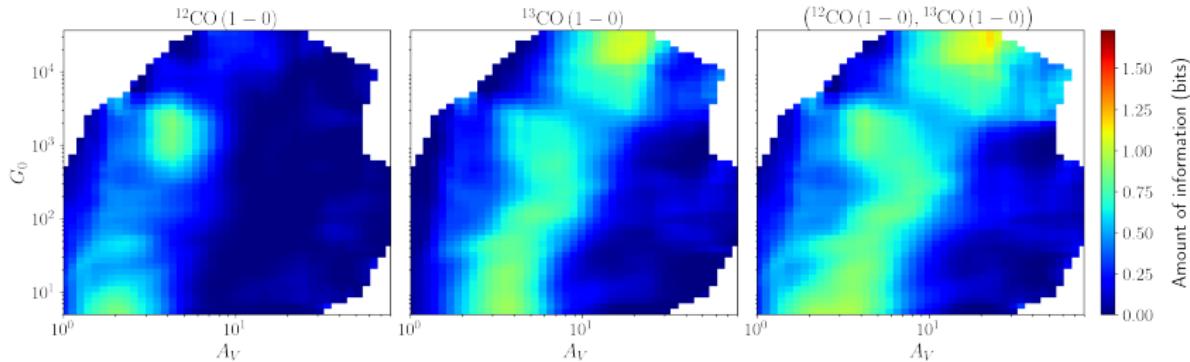

Information gain on A_V when knowing the combination of observables

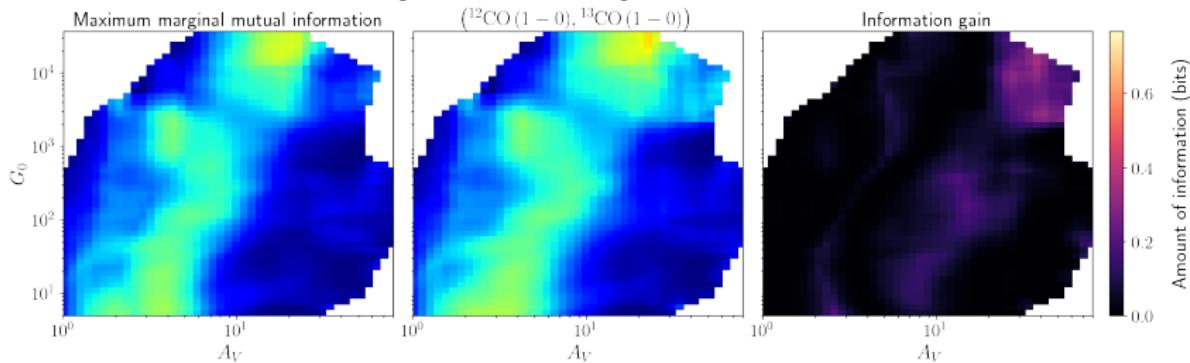

Informativity on A_V of $(^{12}\text{CO} (1 - 0), ^{13}\text{CO} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

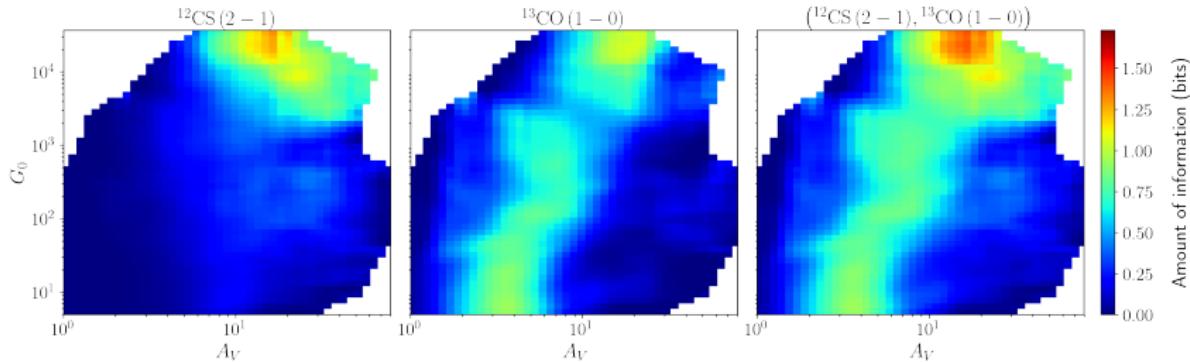

Information gain on A_V when knowing the combination of observables

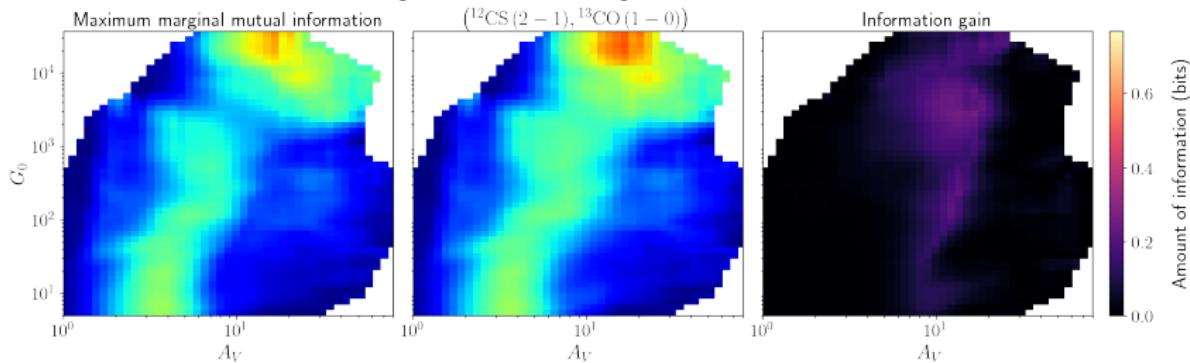

Informativity on A_V of $(^{12}\text{CS} (2 - 1), ^{13}\text{CO} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

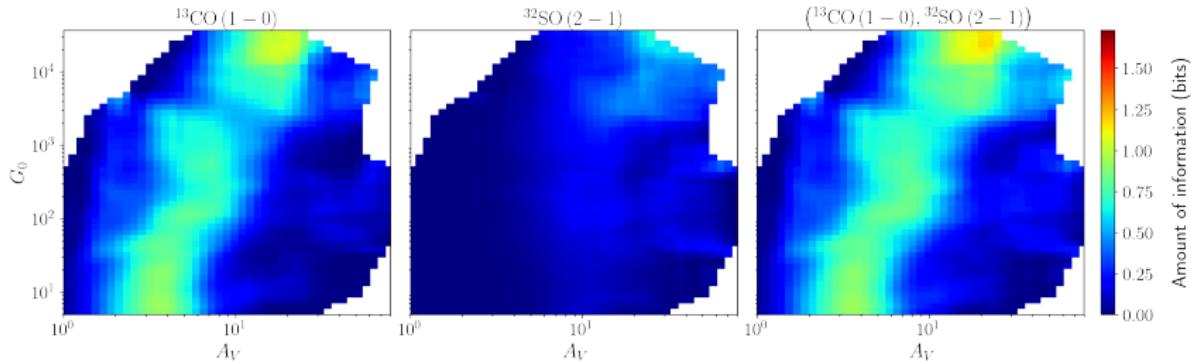

Information gain on A_V when knowing the combination of observables

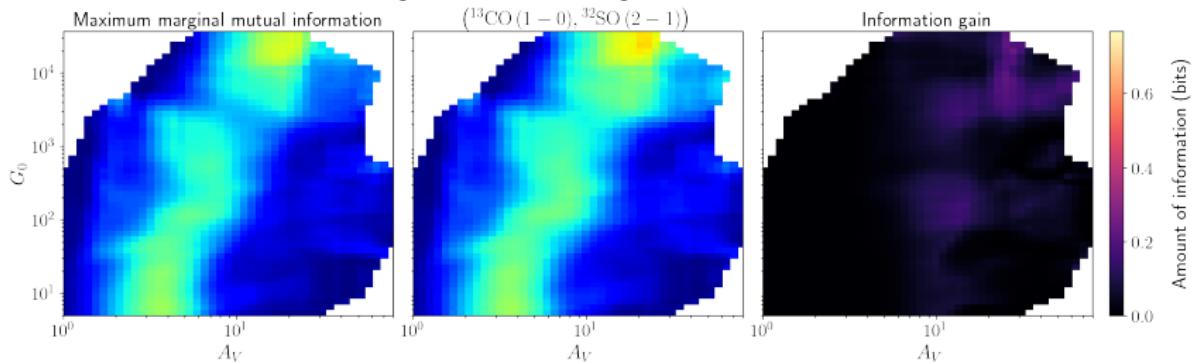

Informativity on A_V of $(^{13}\text{CO} (1 - 0), ^{32}\text{SO} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

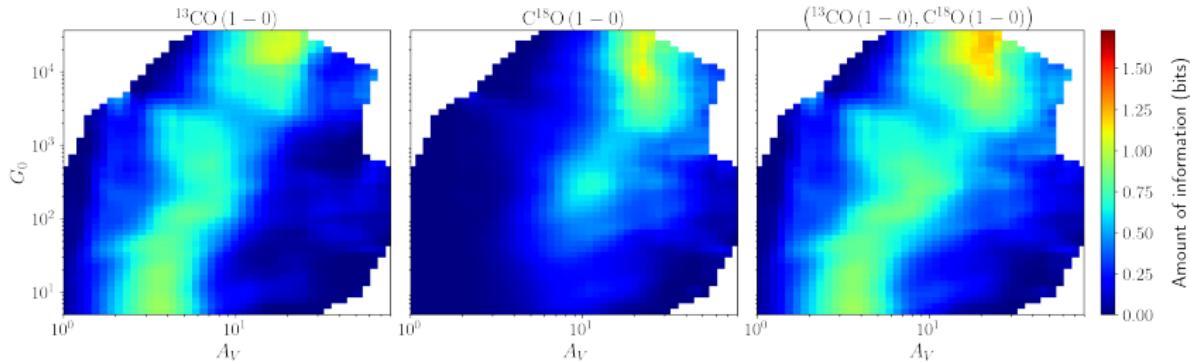

Information gain on A_V when knowing the combination of observables

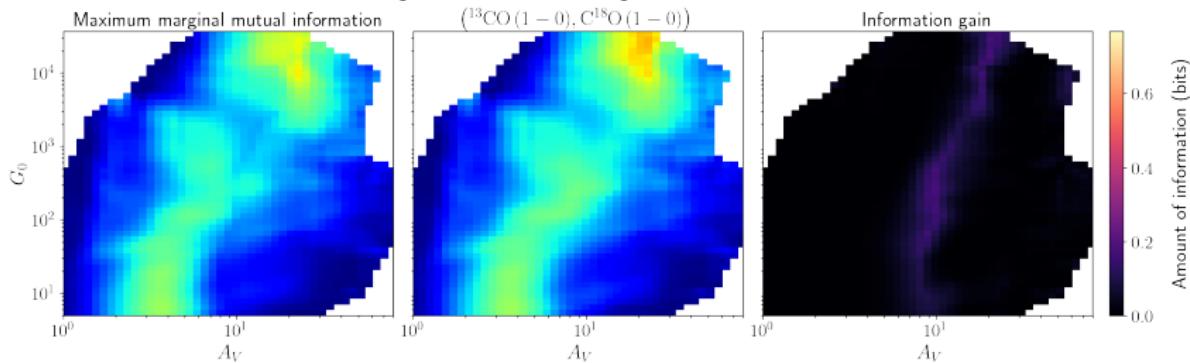

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

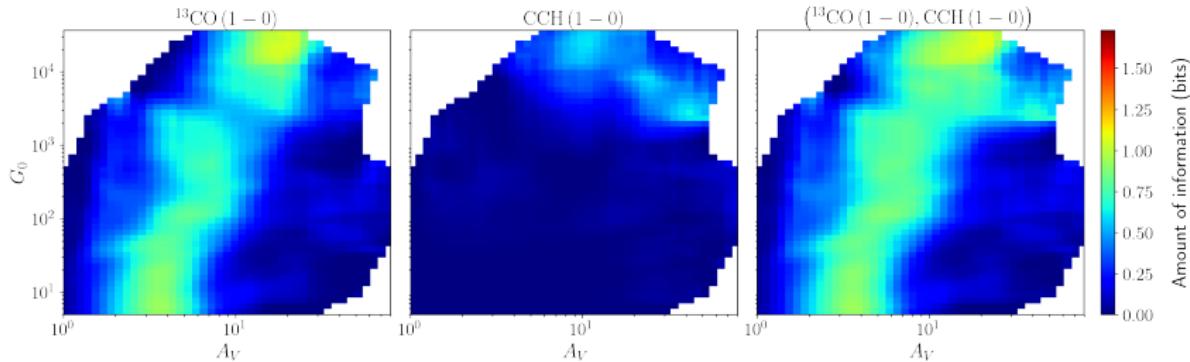

Information gain on A_V when knowing the combination of observables

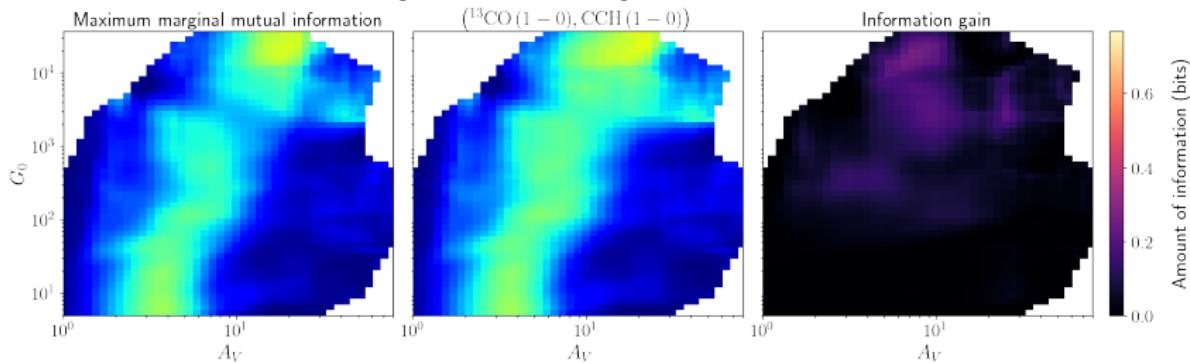

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{CCH} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

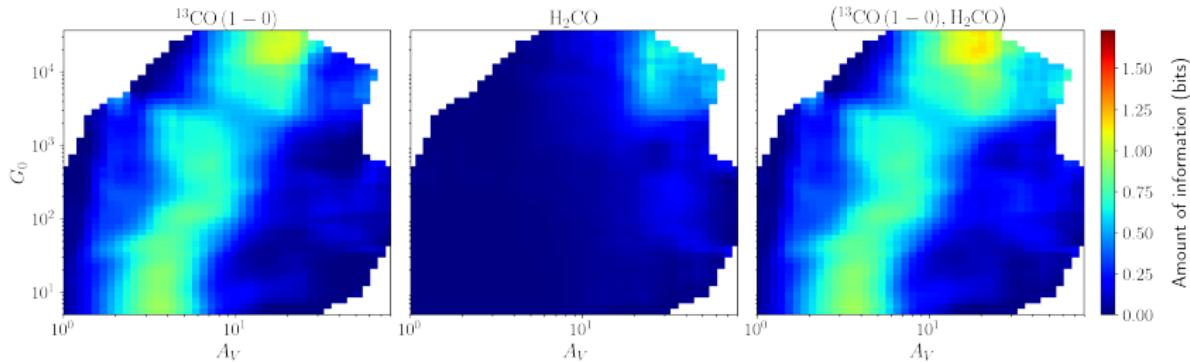

Information gain on A_V when knowing the combination of observables

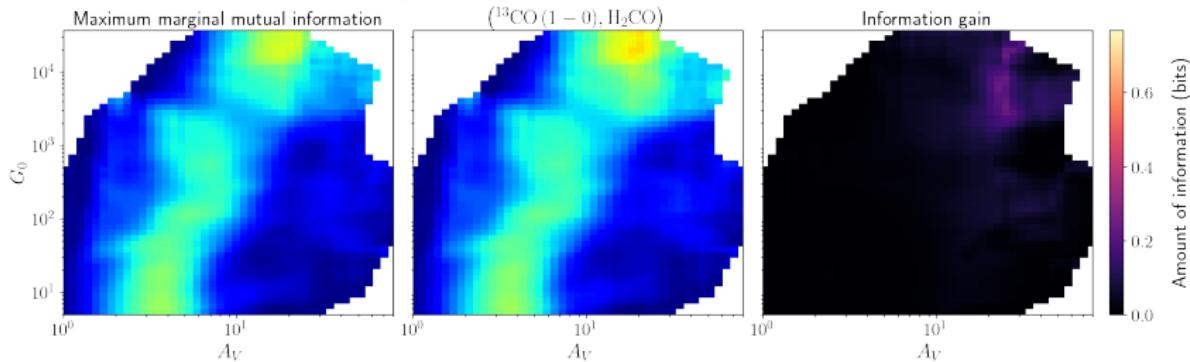

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

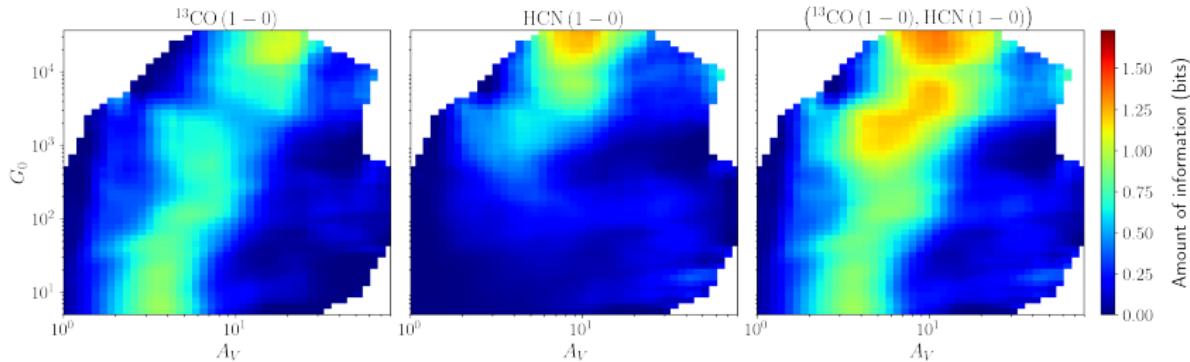

Information gain on A_V when knowing the combination of observables

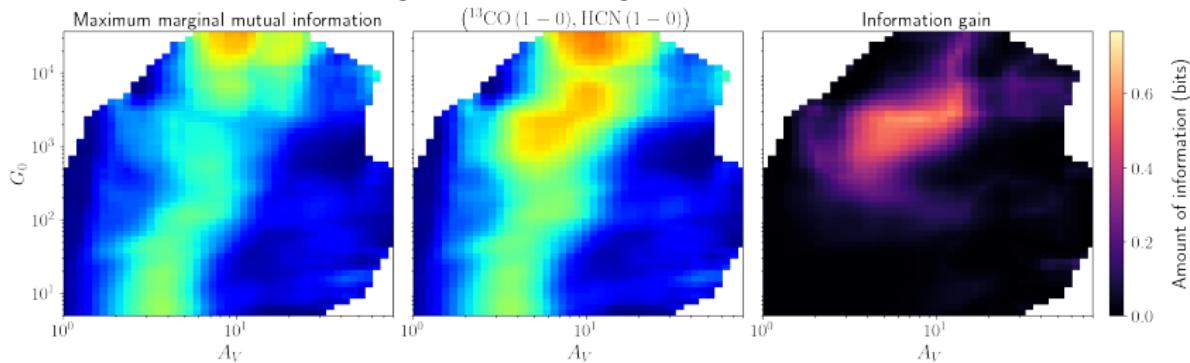

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{HCN} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

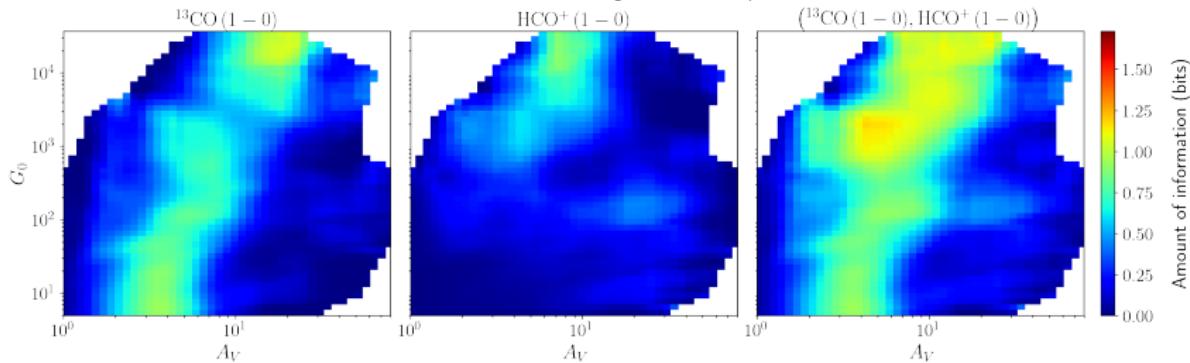

Information gain on A_V when knowing the combination of observables

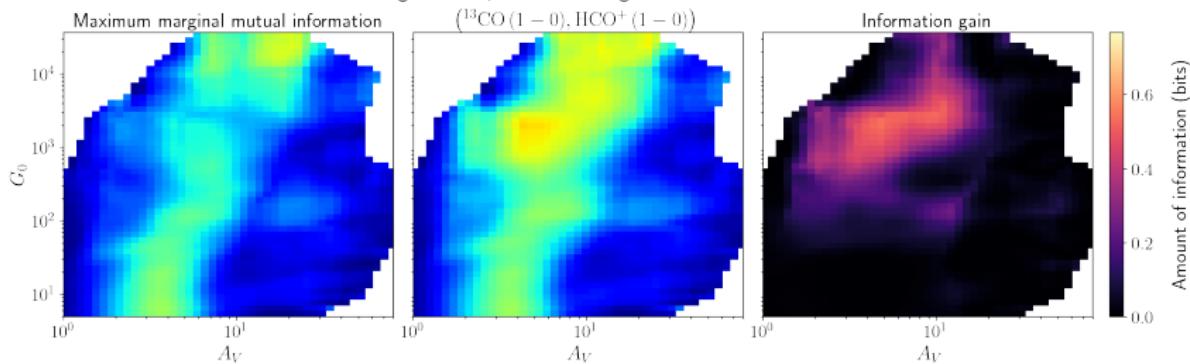

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{HCO}^+ (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

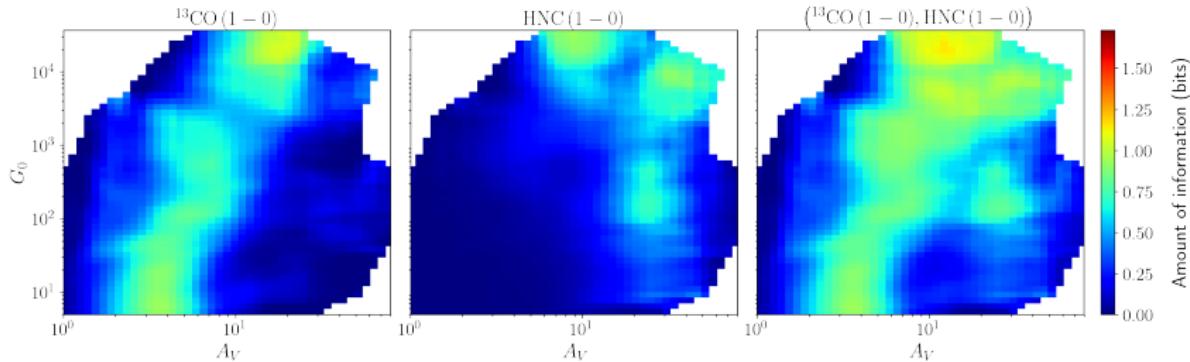

Information gain on A_V when knowing the combination of observables

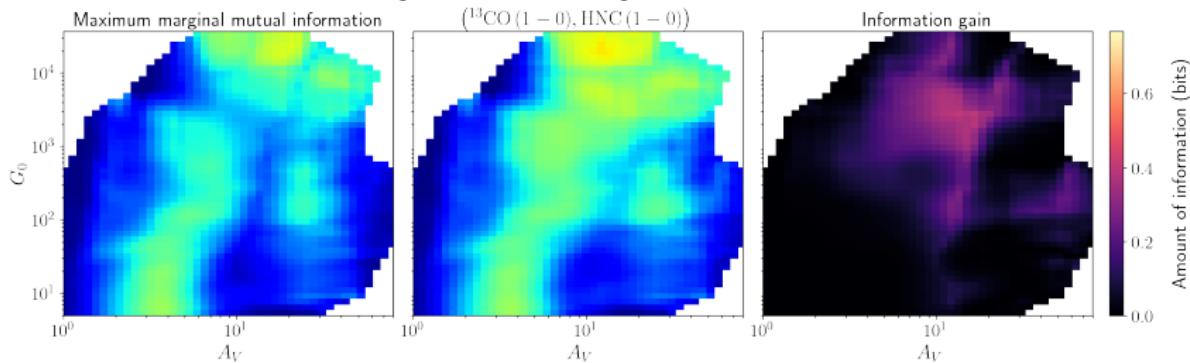

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{HNC} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

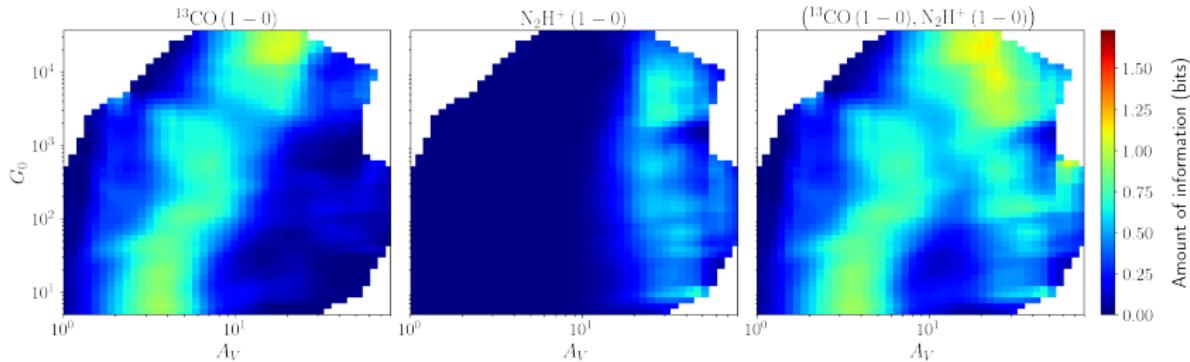

Information gain on A_V when knowing the combination of observables

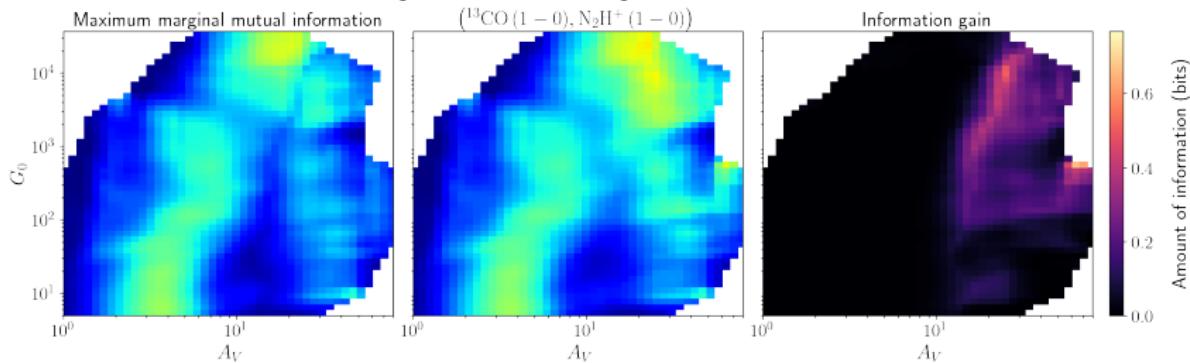

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{N}_2\text{H}^+ (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

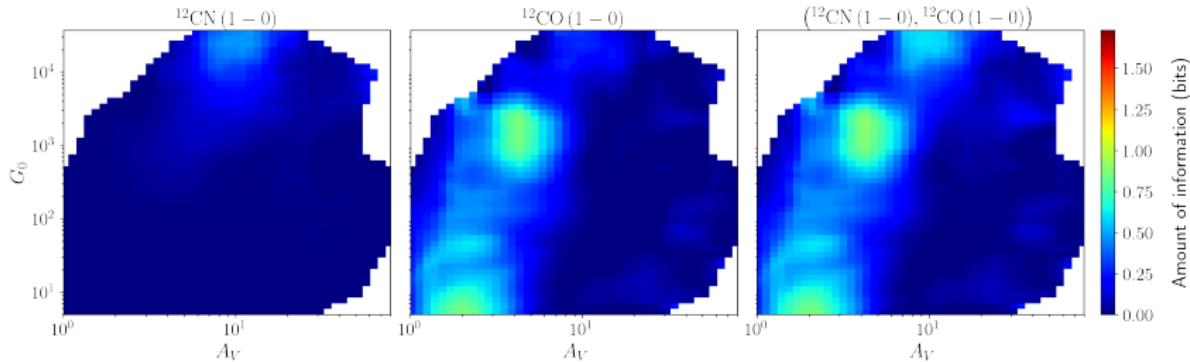

Outline

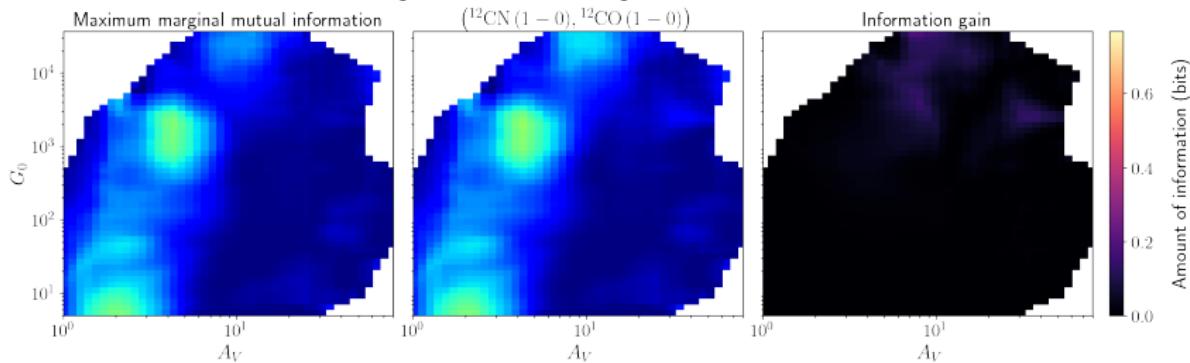

- 1 Combinations including ^{13}CO (1 – 0) (11 available)**
- 2 Combinations including ^{12}CO (1 – 0) (11 available)**
- 3 Combinations including C^{18}O (1 – 0) (11 available)**
- 4 Combinations including ^{32}SO (2 – 1) (11 available)**
- 5 Combinations including ^{12}CN (1 – 0) (11 available)**
- 6 Combinations including N_2H^+ (1 – 0) (11 available)**
- 7 Combinations including CCH (1 – 0) (11 available)**
- 8 Combinations including HCO^+ (1 – 0) (11 available)**
- 9 Combinations including H_2CO (11 available)**
- 10 Combinations including ^{12}CS (2 – 1) (11 available)**
- 11 Combinations including HCN (1 – 0) (11 available)**
- 12 Combinations including HNC (1 – 0) (11 available)**

Informativity on A_V of $(^{12}\text{CN} (1 - 0), ^{12}\text{CO} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

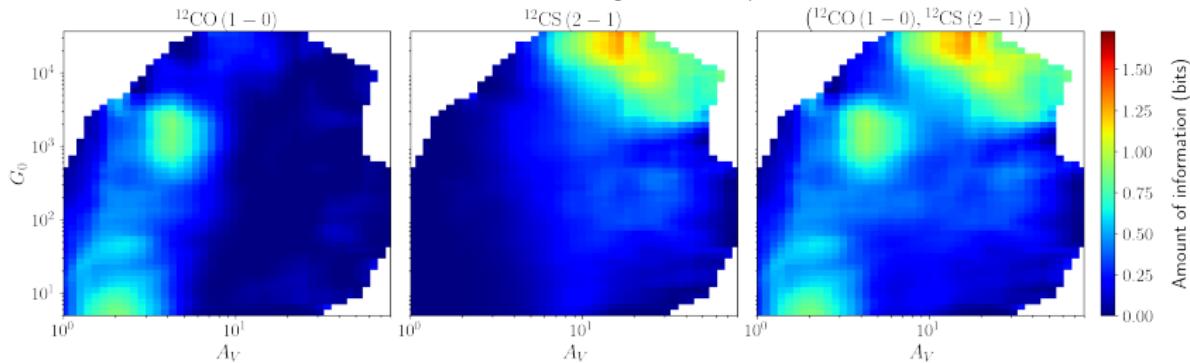

Information gain on A_V when knowing the combination of observables

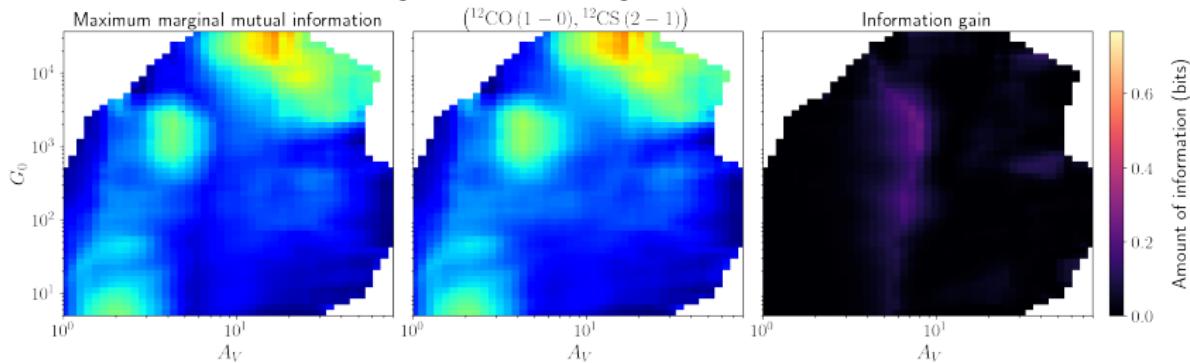

Informativity on A_V of $(^{12}\text{CO} (1 - 0), ^{12}\text{CS} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

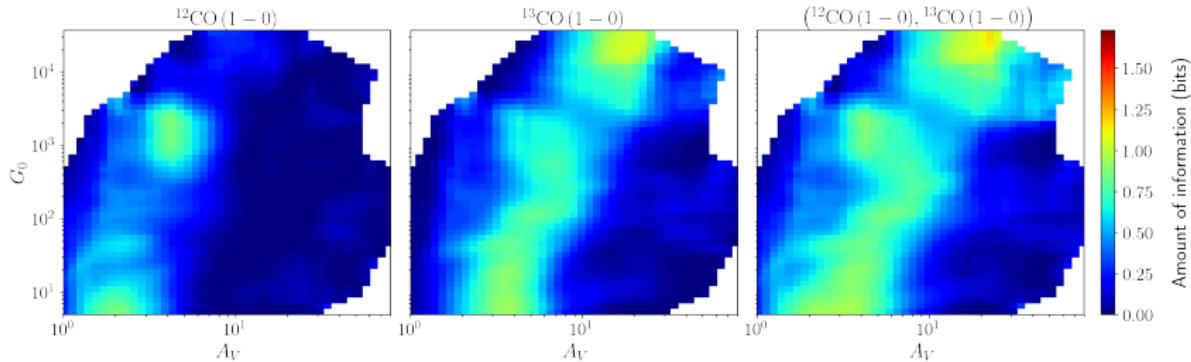

Information gain on A_V when knowing the combination of observables

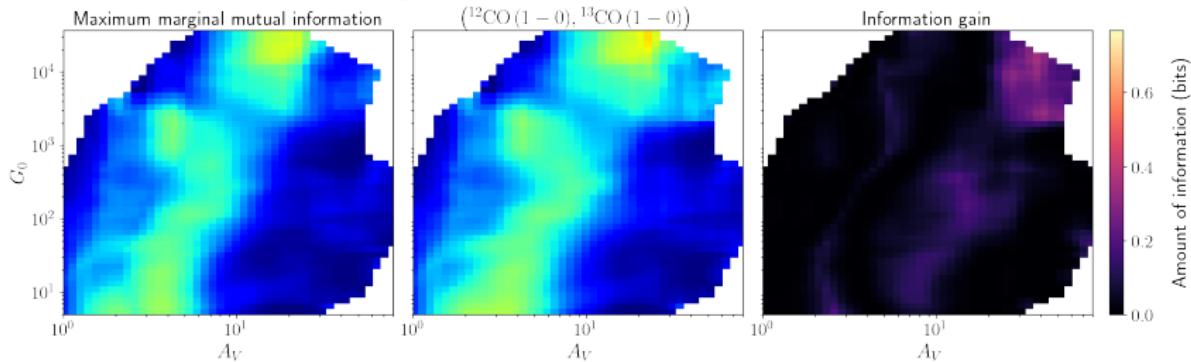

Informativity on A_V of $(^{12}\text{CO} (1 - 0), ^{13}\text{CO} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

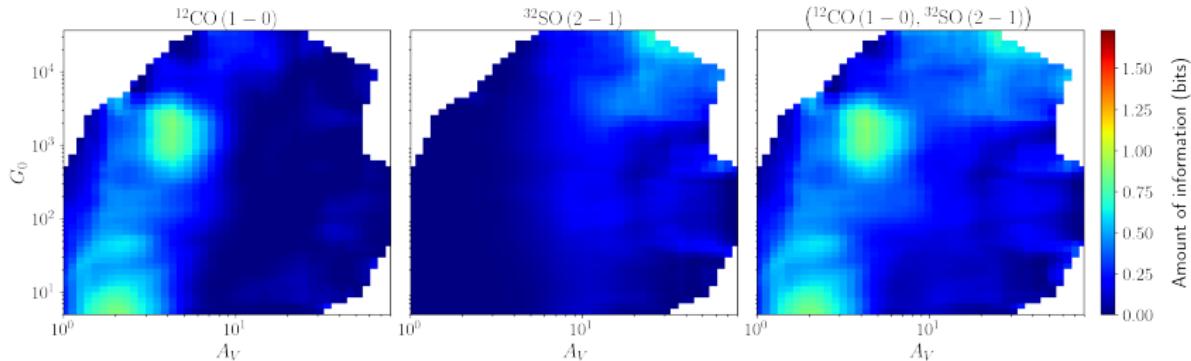

Information gain on A_V when knowing the combination of observables

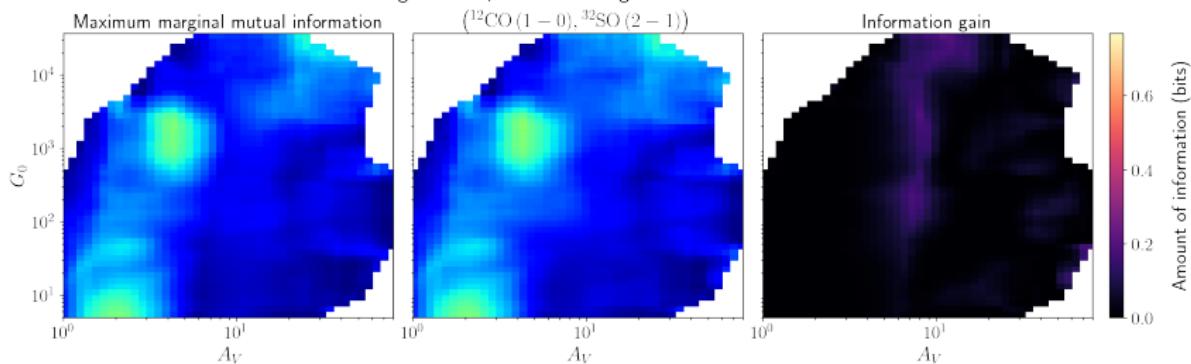

Informativity on A_V of $(^{12}\text{CO} (1 - 0), ^{32}\text{SO} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

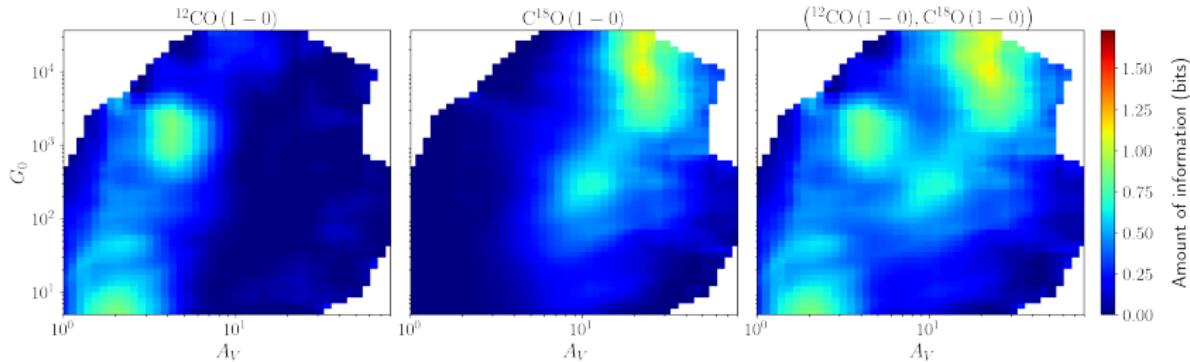

Information gain on A_V when knowing the combination of observables

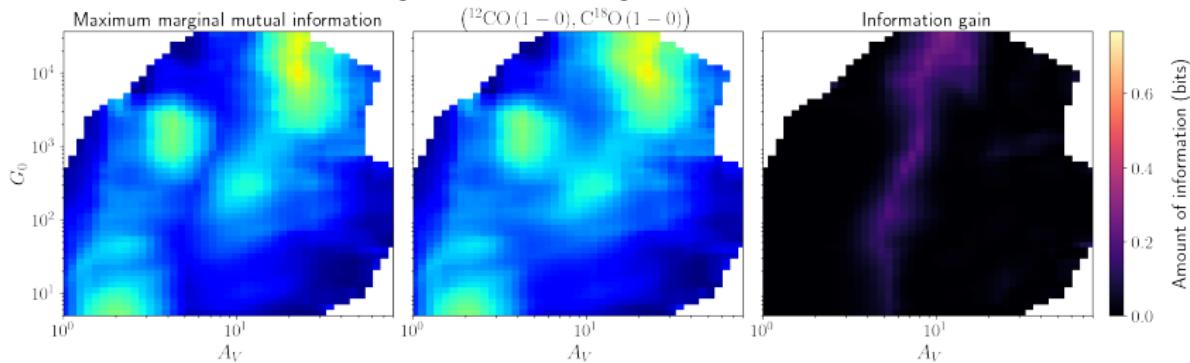

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

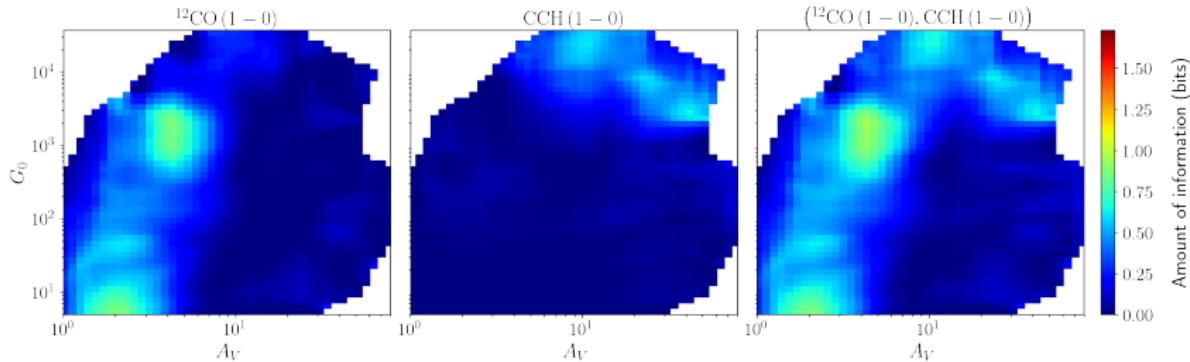

Information gain on A_V when knowing the combination of observables

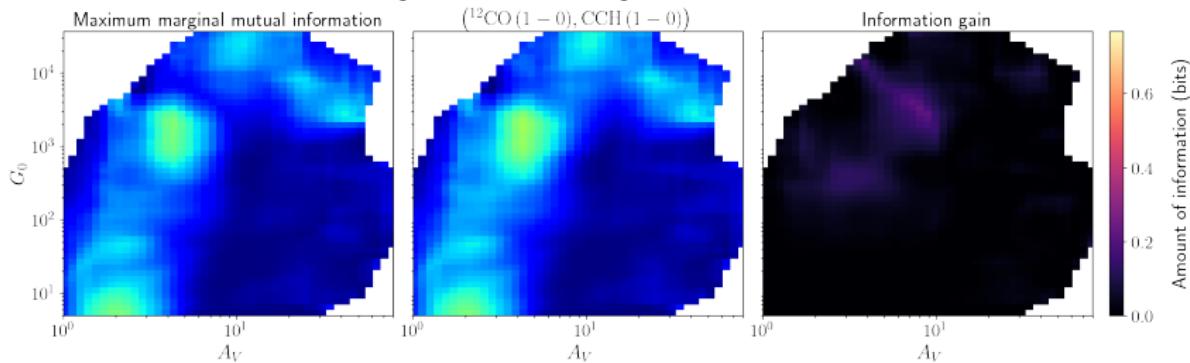

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{CCH} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

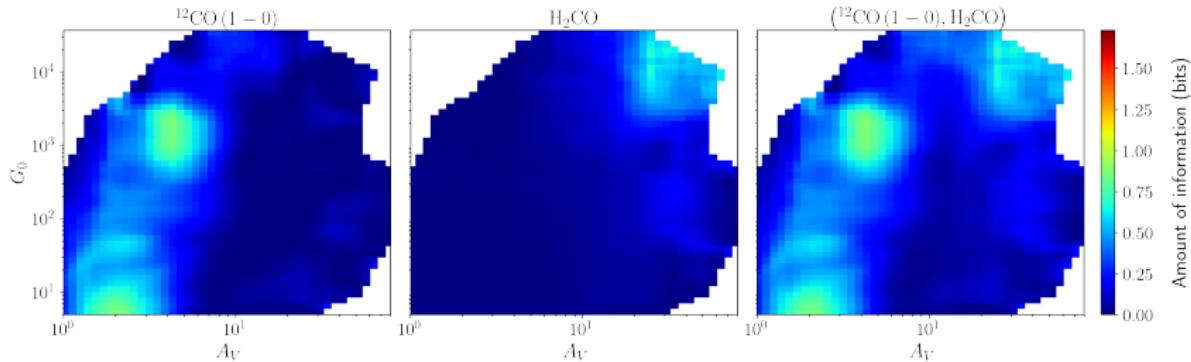

Information gain on A_V when knowing the combination of observables

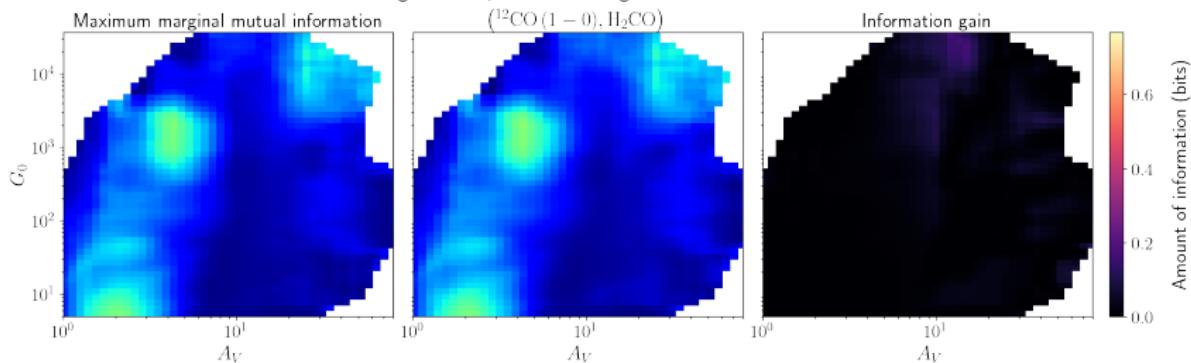

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

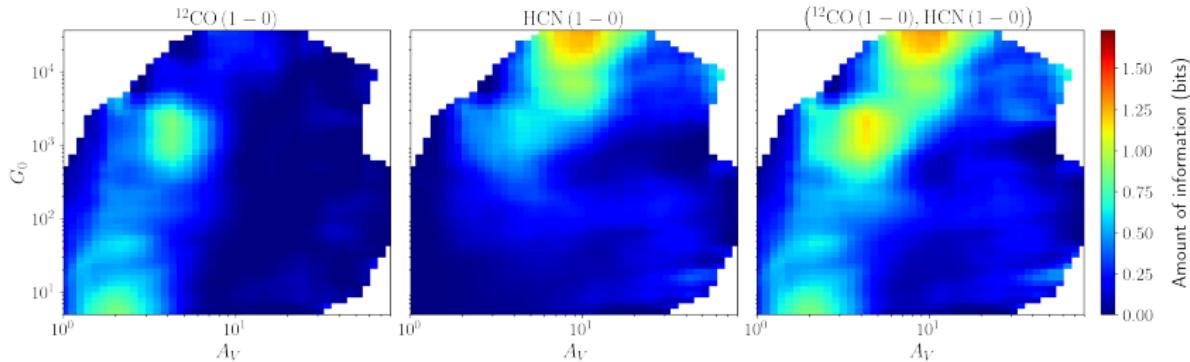

Information gain on A_V when knowing the combination of observables

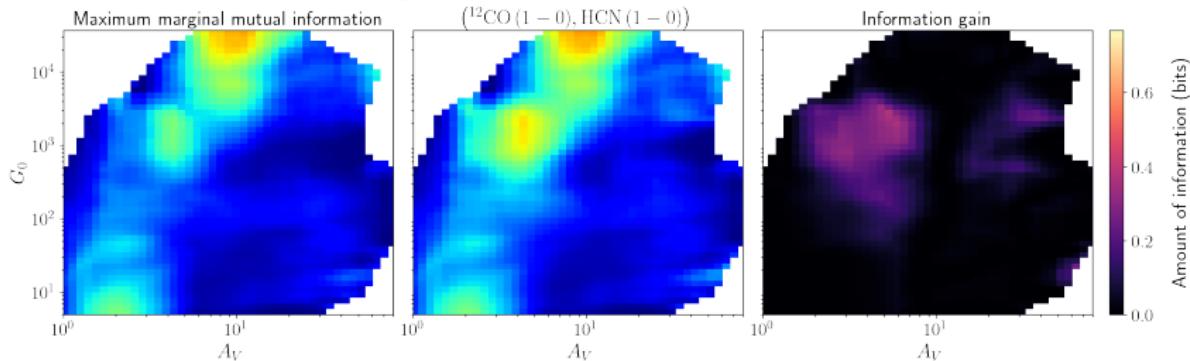

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{HCN} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

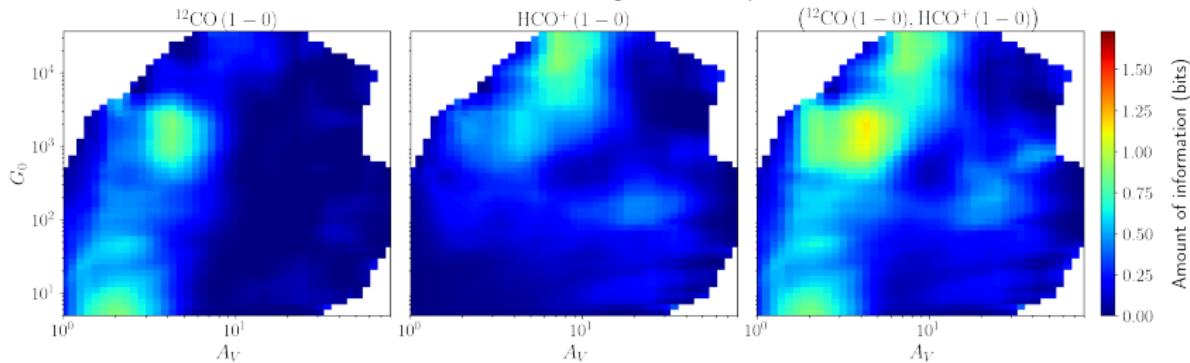

Information gain on A_V when knowing the combination of observables

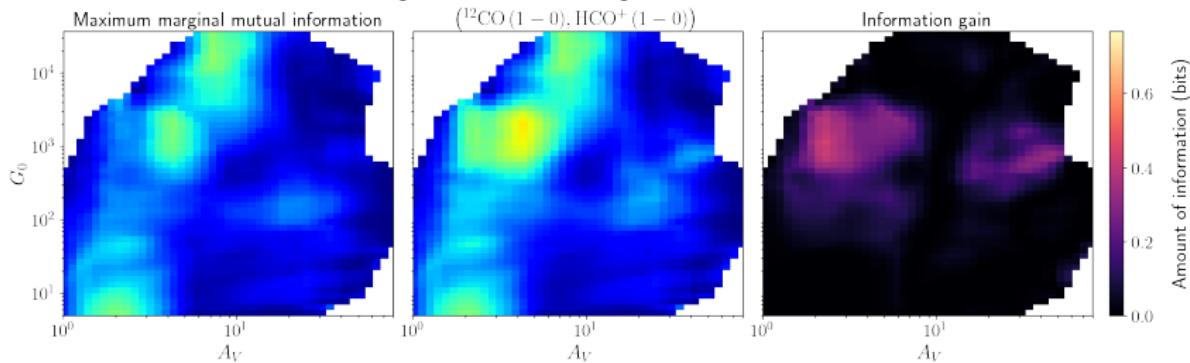

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{HCO}^+ (1 - 0))$

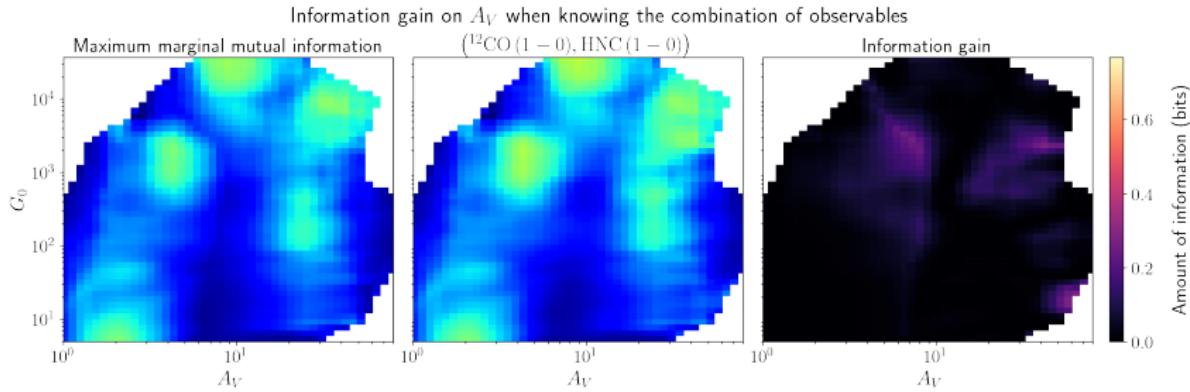

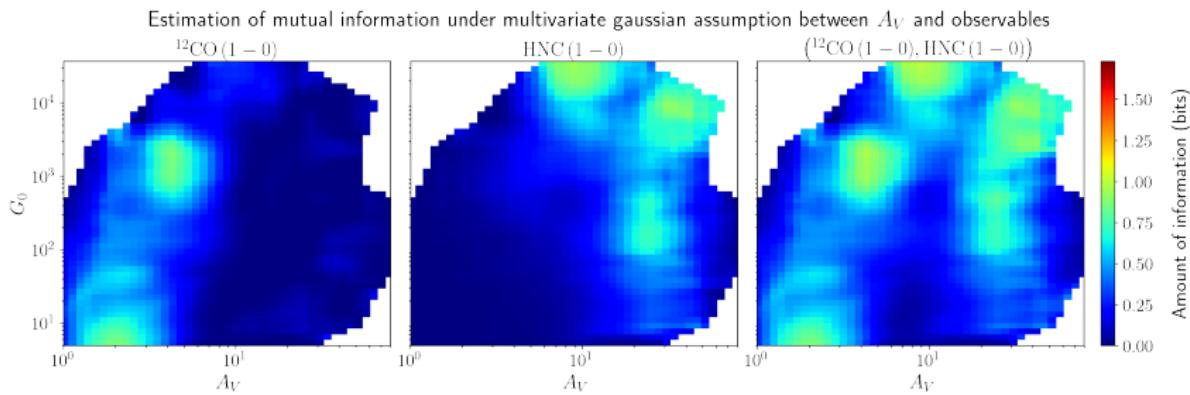

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

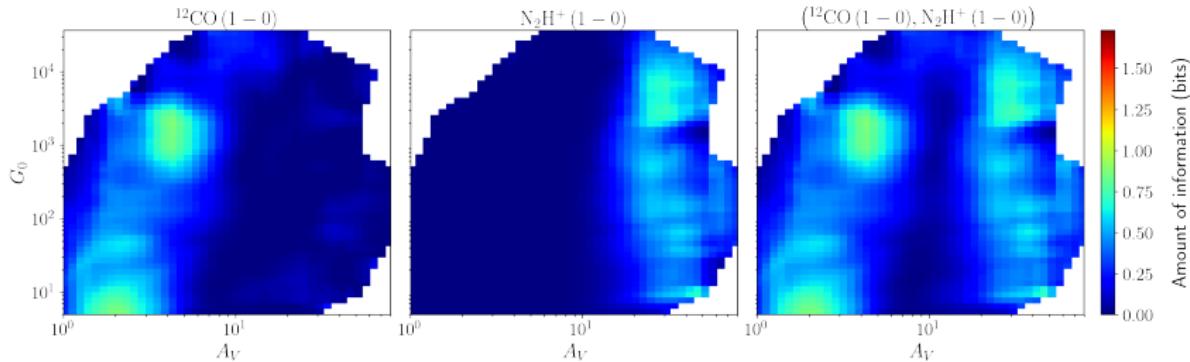

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{HNC} (1 - 0))$

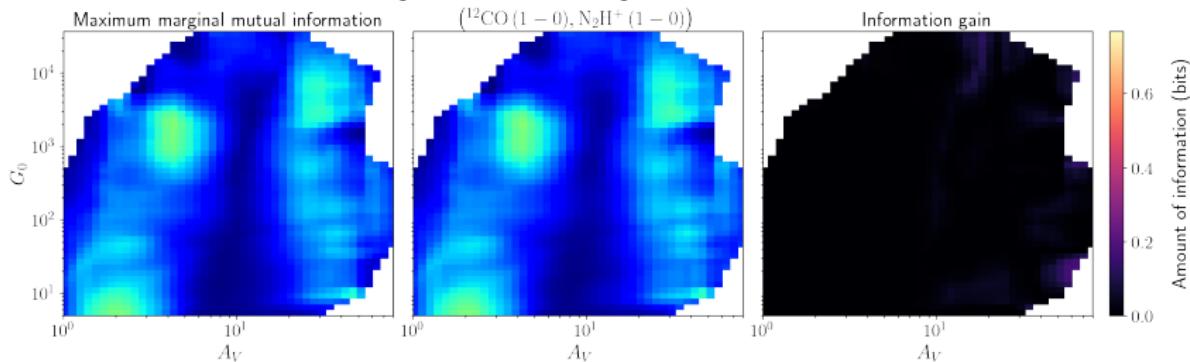

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{N}_2\text{H}^+ (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

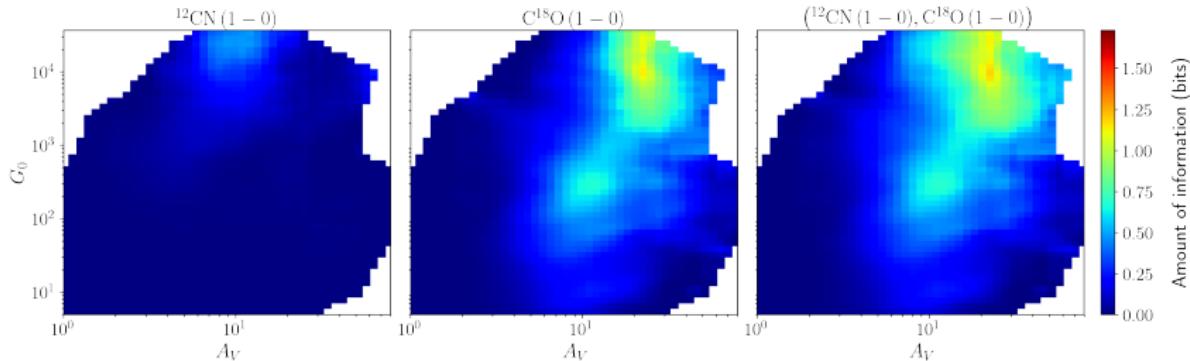

Outline

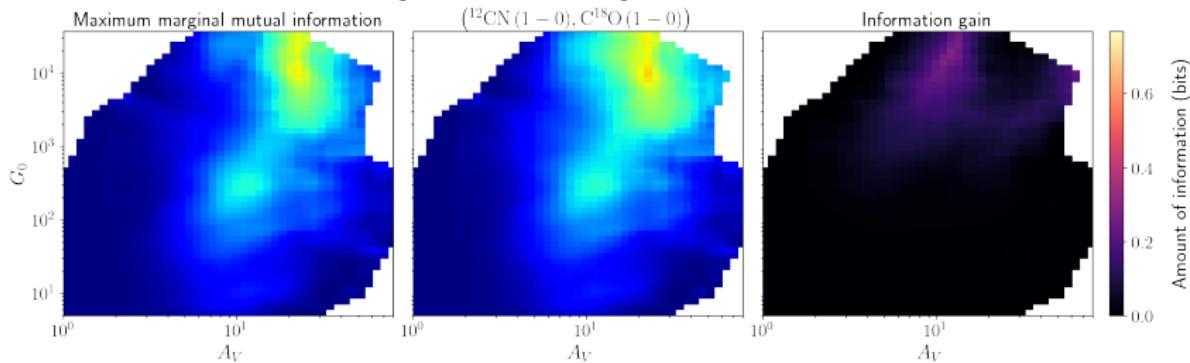

- 1 Combinations including ^{13}CO (1 – 0) (11 available)
- 2 Combinations including ^{12}CO (1 – 0) (11 available)
- 3 Combinations including C^{18}O (1 – 0) (11 available)**
- 4 Combinations including ^{32}SO (2 – 1) (11 available)
- 5 Combinations including ^{12}CN (1 – 0) (11 available)
- 6 Combinations including N_2H^+ (1 – 0) (11 available)
- 7 Combinations including CCH (1 – 0) (11 available)
- 8 Combinations including HCO^+ (1 – 0) (11 available)
- 9 Combinations including H_2CO (11 available)
- 10 Combinations including ^{12}CS (2 – 1) (11 available)
- 11 Combinations including HCN (1 – 0) (11 available)
- 12 Combinations including HNC (1 – 0) (11 available)

Informativity on A_V of $(^{12}\text{CN}(1 - 0), \text{C}^{18}\text{O}(1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

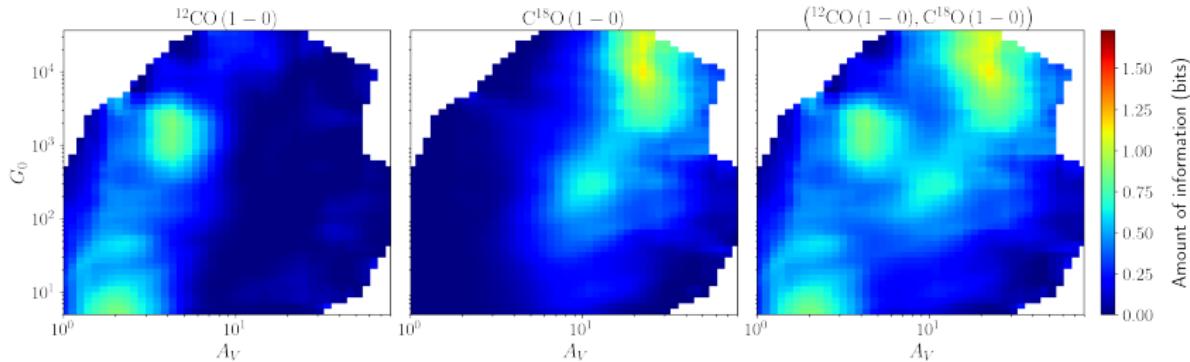

Information gain on A_V when knowing the combination of observables

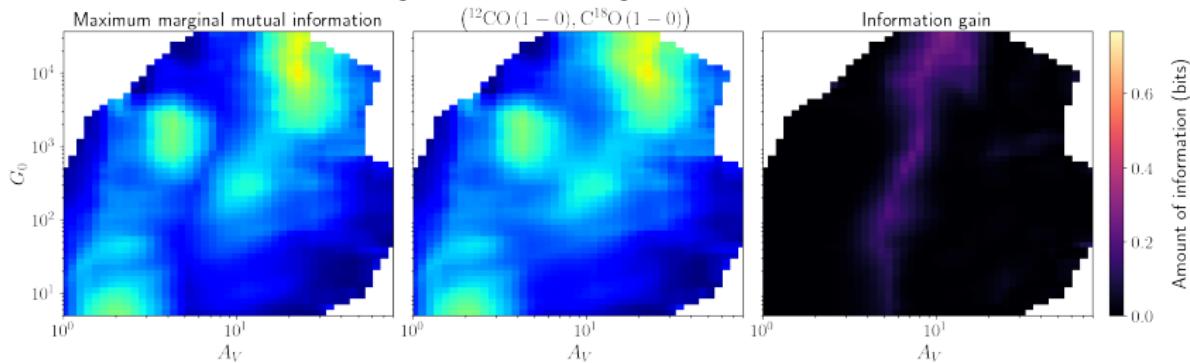

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

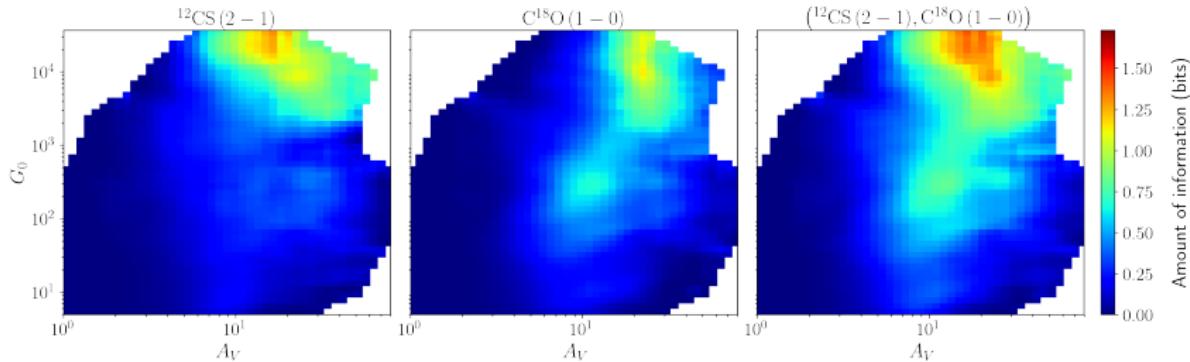

Information gain on A_V when knowing the combination of observables

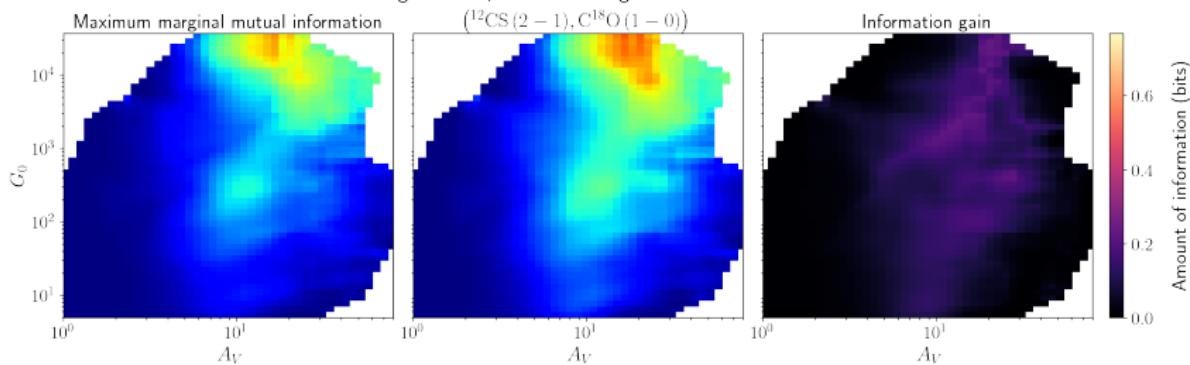

Informativity on A_V of $(^{12}\text{CS} (2 - 1), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

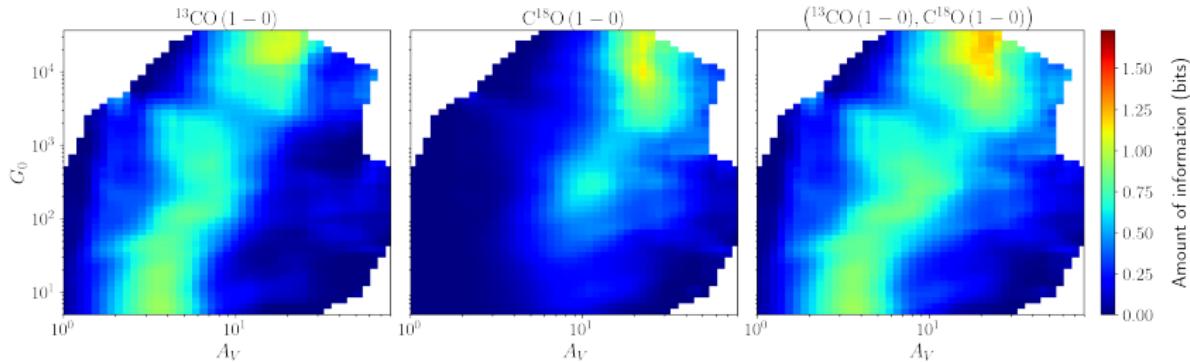

Information gain on A_V when knowing the combination of observables

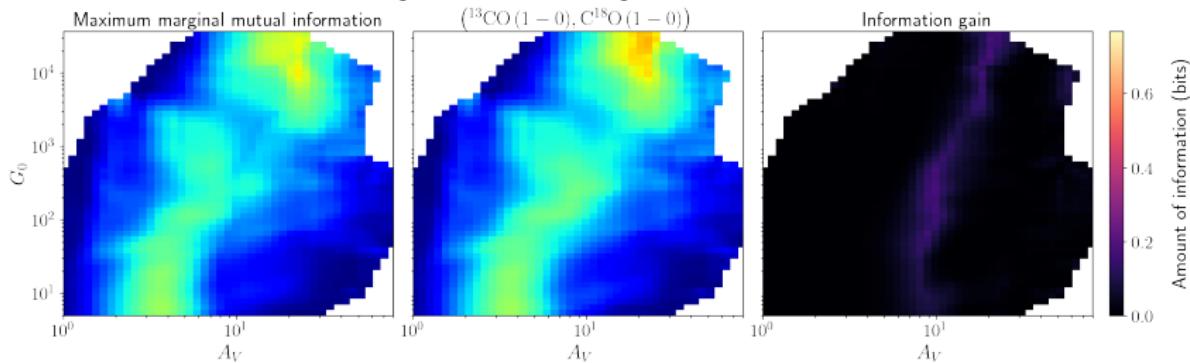

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Informativity on A_V of $(C^{18}O(1 - 0), CCH(1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Informativity on A_V of $(C^{18}O(1 - 0), H_2CO)$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Informativity on A_V of $(C^{18}O(1 - 0), HCN(1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Informativity on A_V of $(C^{18}O(1 - 0), HCO^+(1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Informativity on A_V of $(C^{18}O(1-0), HNC(1-0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Informativity on A_V of $(C^{18}O(1-0), N_2H^+(1-0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

Outline

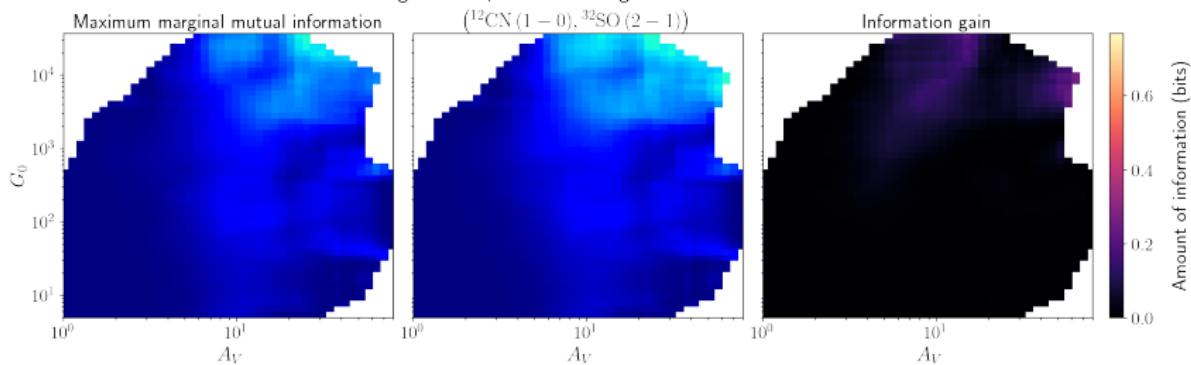

- 1 Combinations including ^{13}CO (1 – 0) (11 available)
- 2 Combinations including ^{12}CO (1 – 0) (11 available)
- 3 Combinations including C^{18}O (1 – 0) (11 available)
- 4 **Combinations including ^{32}SO (2 – 1) (11 available)**

- 11 Combinations including HCN (1 – 0) (11 available)
- 12 Combinations including HNC (1 – 0) (11 available)

Informativity on A_V of $(^{12}\text{CN} (1 - 0), ^{32}\text{SO} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

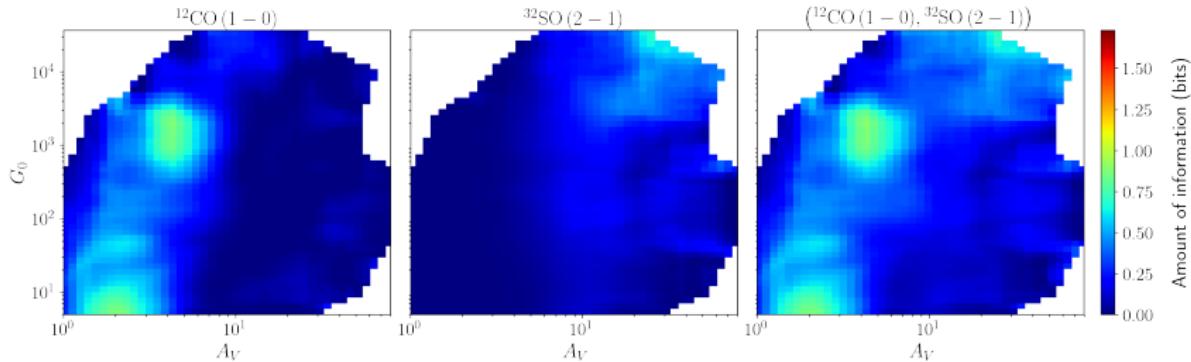

Information gain on A_V when knowing the combination of observables

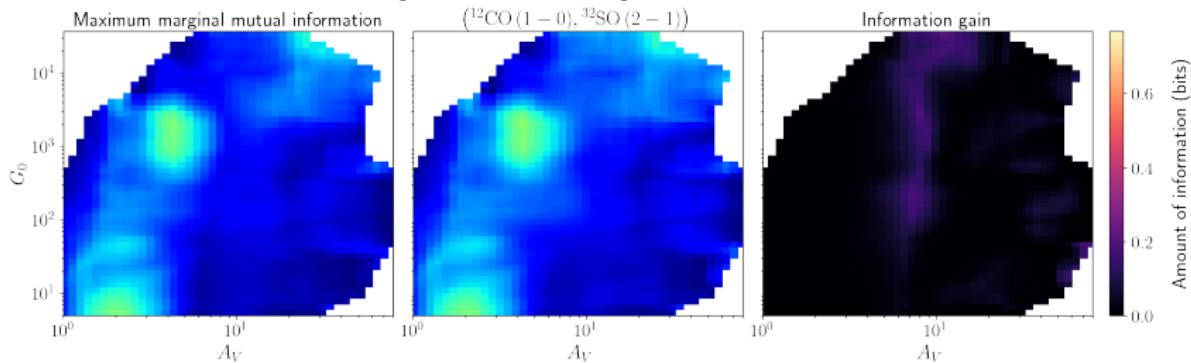

Informativity on A_V of $(^{12}\text{CO} (1 - 0), ^{32}\text{SO} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

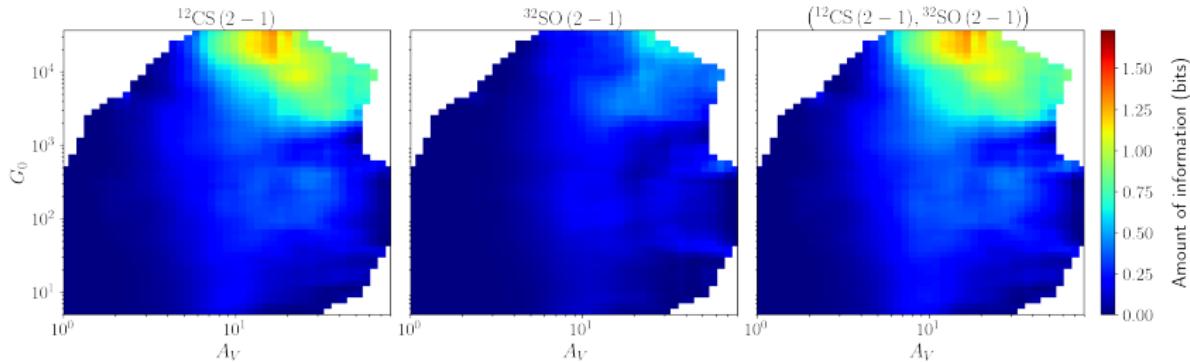

Information gain on A_V when knowing the combination of observables

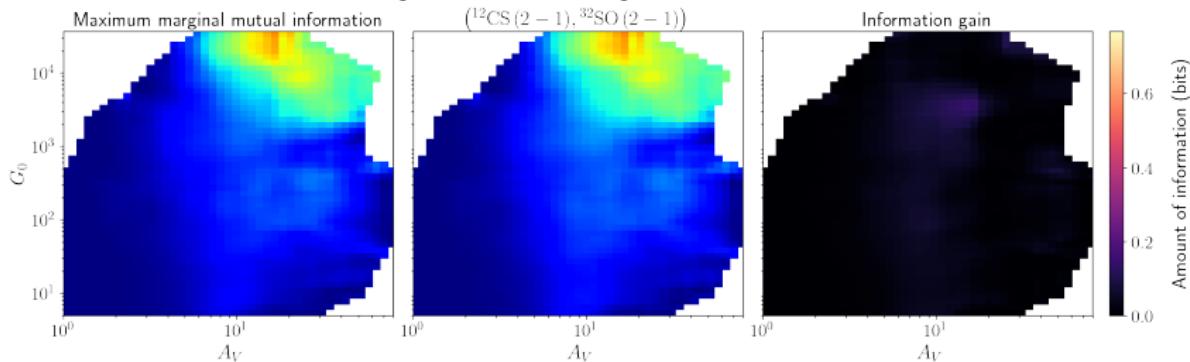

Informativity on A_V of $(^{12}\text{CS} (2 - 1), ^{32}\text{SO} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

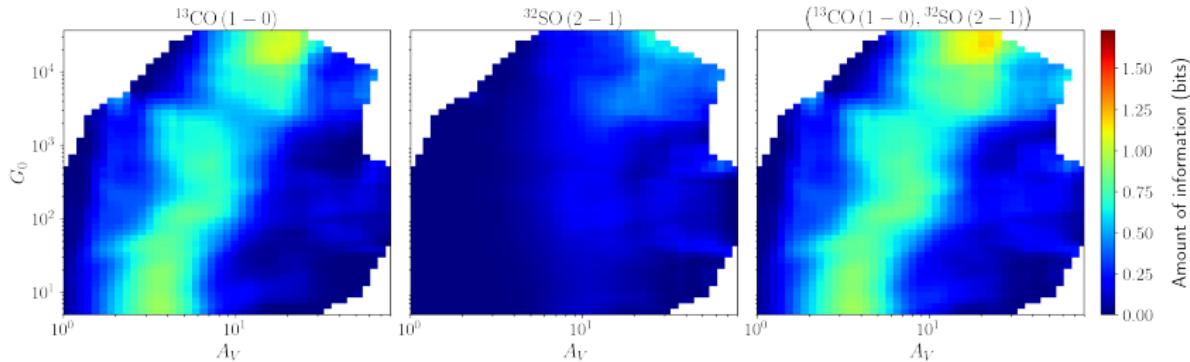

Information gain on A_V when knowing the combination of observables

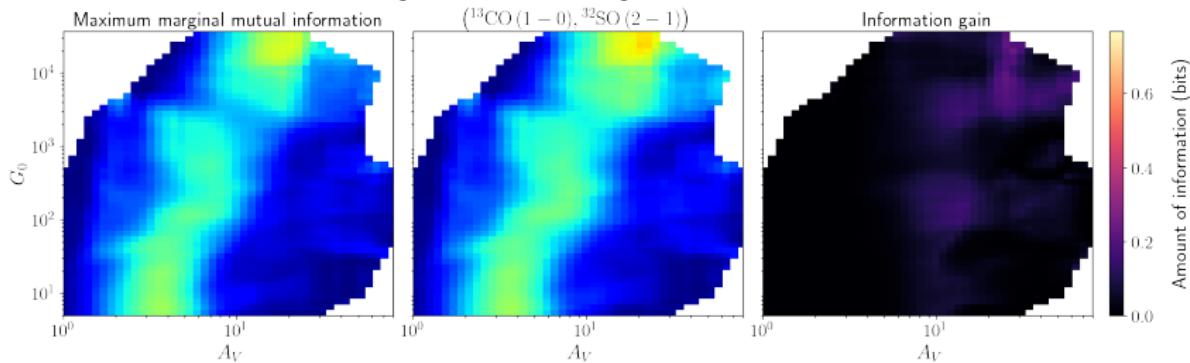

Informativity on A_V of $(^{13}\text{CO} (1 - 0), ^{32}\text{SO} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

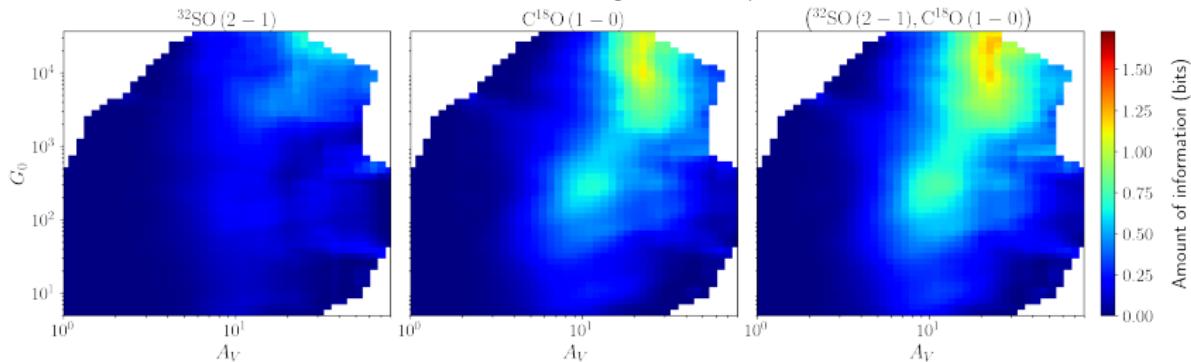

Information gain on A_V when knowing the combination of observables

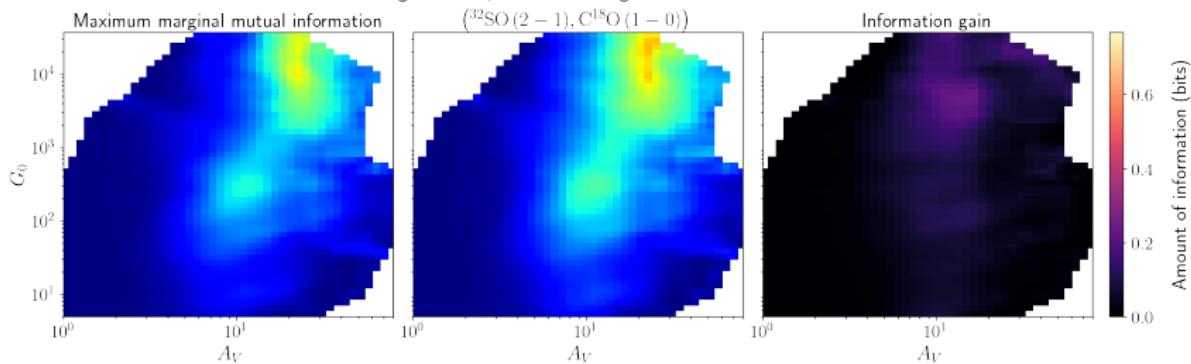

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

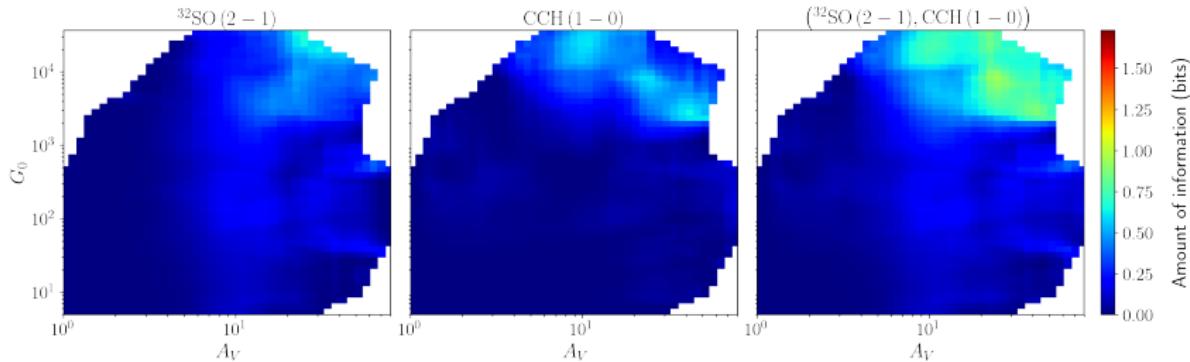

Information gain on A_V when knowing the combination of observables

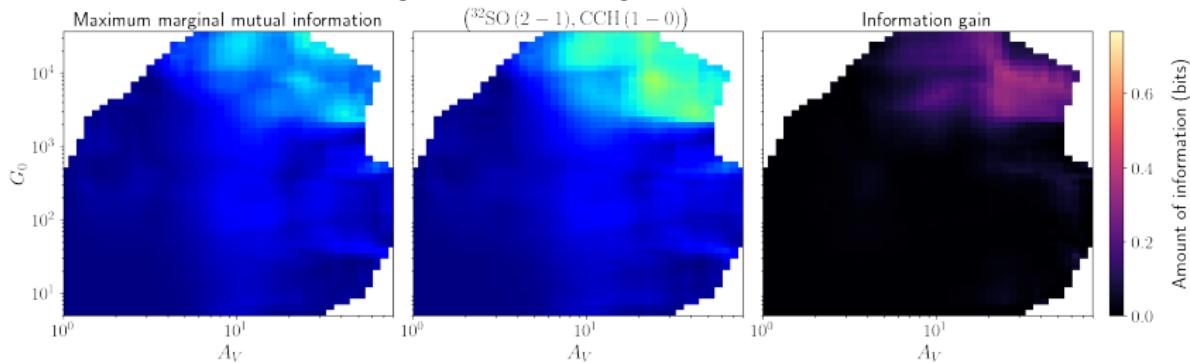

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{CCH} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

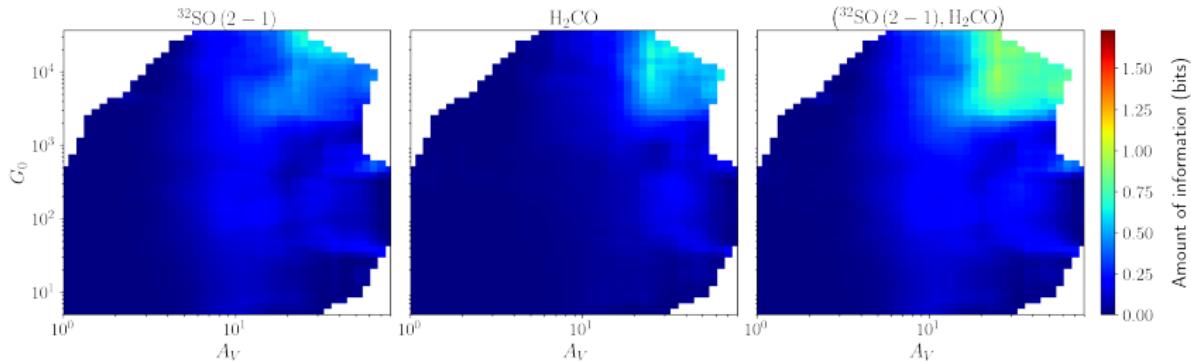

Information gain on A_V when knowing the combination of observables

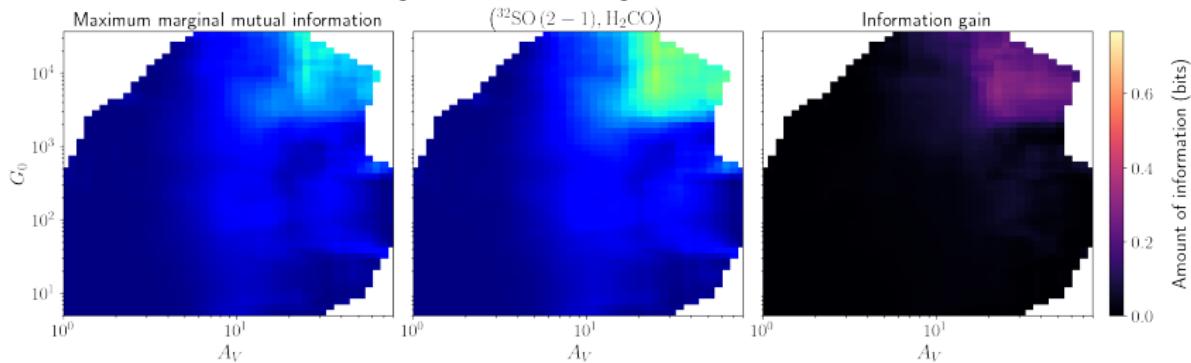

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

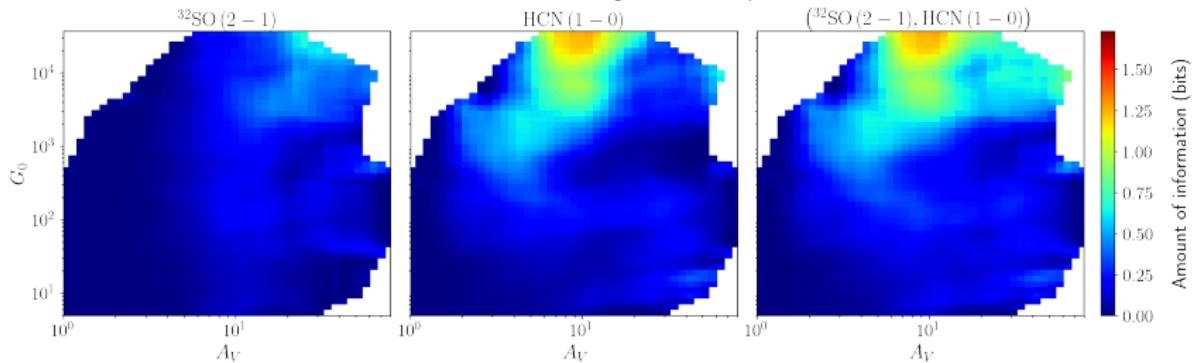

Information gain on A_V when knowing the combination of observables

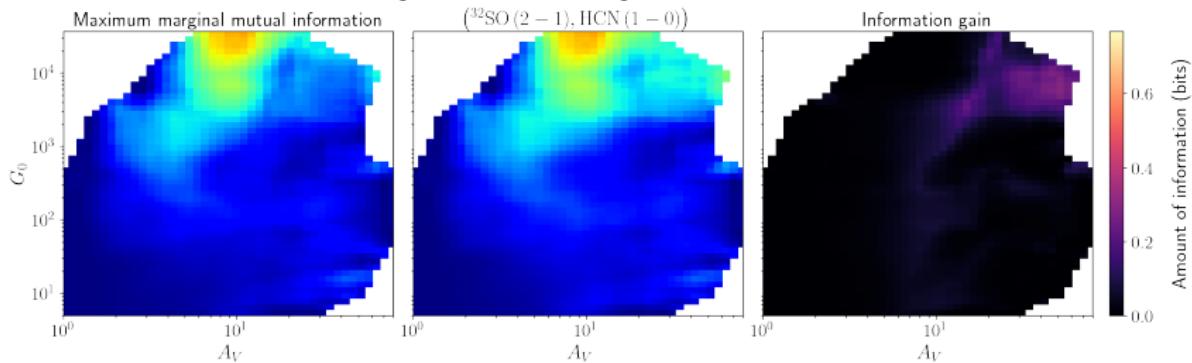

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{HCN} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

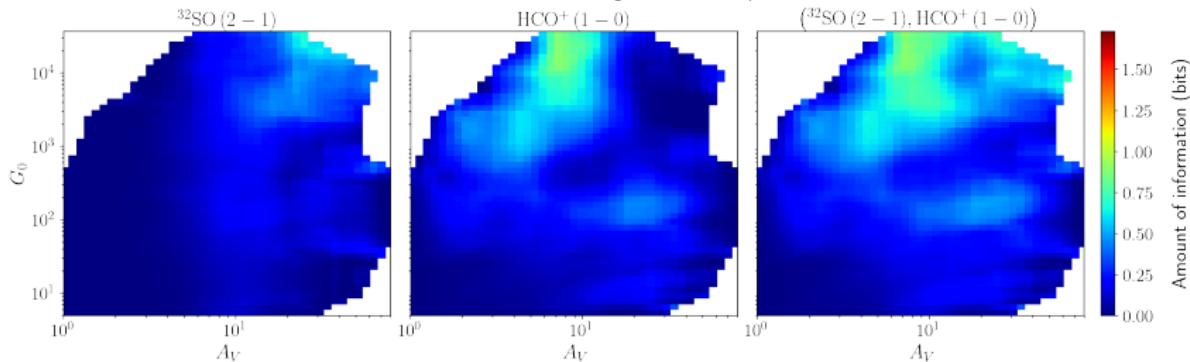

Information gain on A_V when knowing the combination of observables

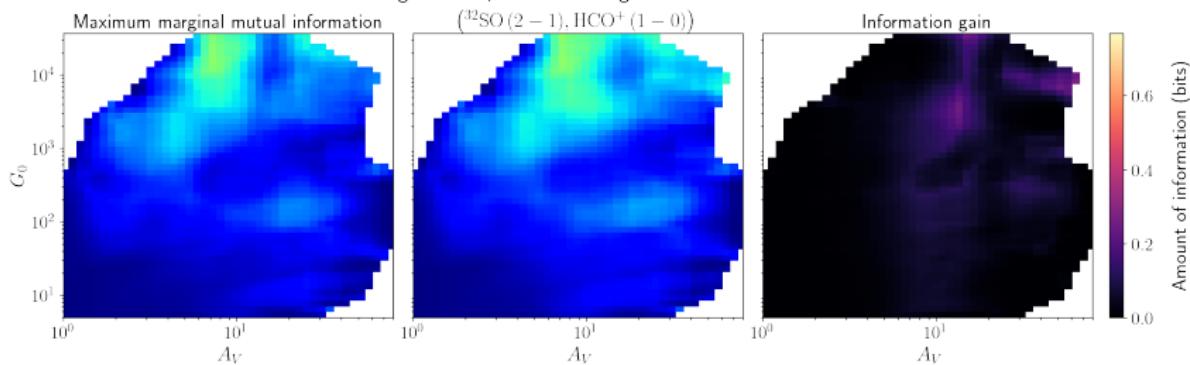

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{HCO}^+ (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

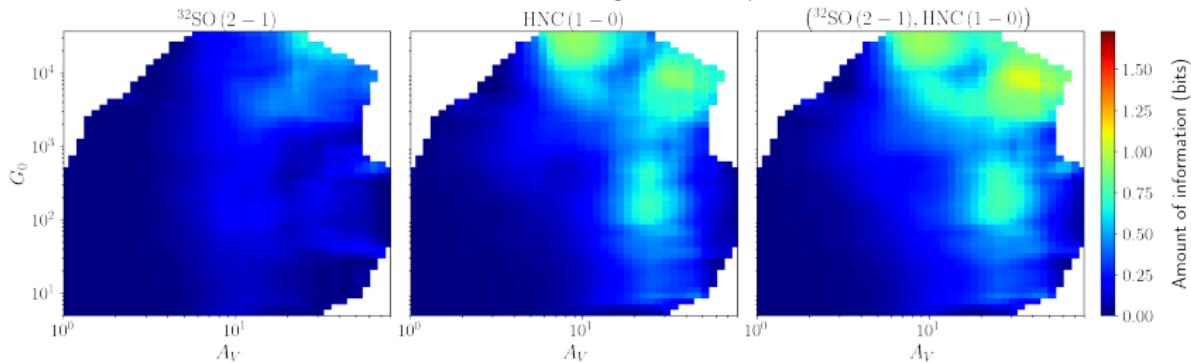

Information gain on A_V when knowing the combination of observables

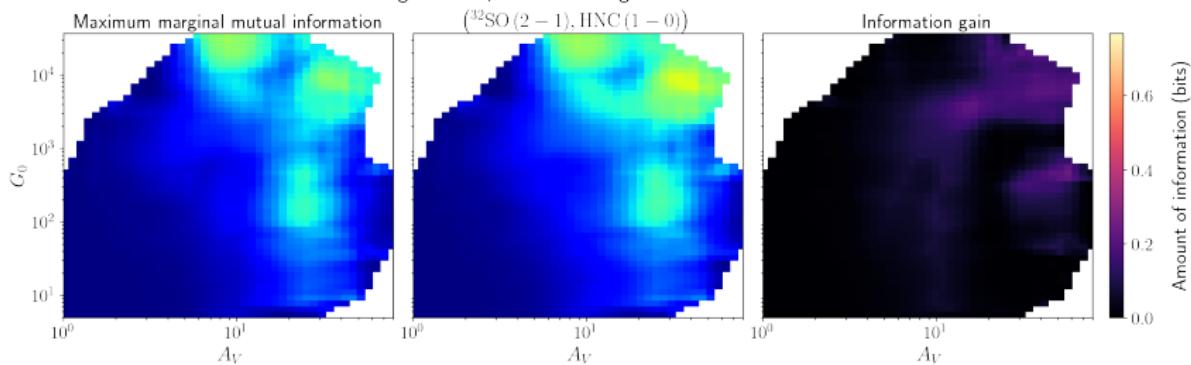

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{HNC} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

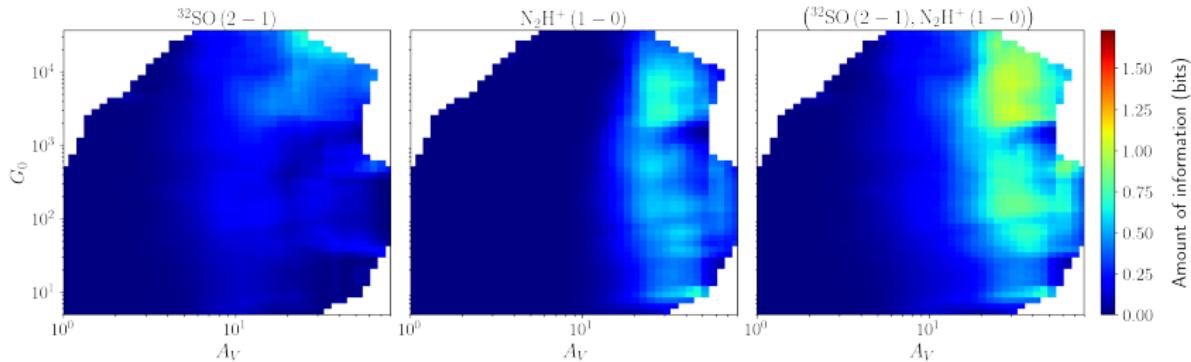

Information gain on A_V when knowing the combination of observables

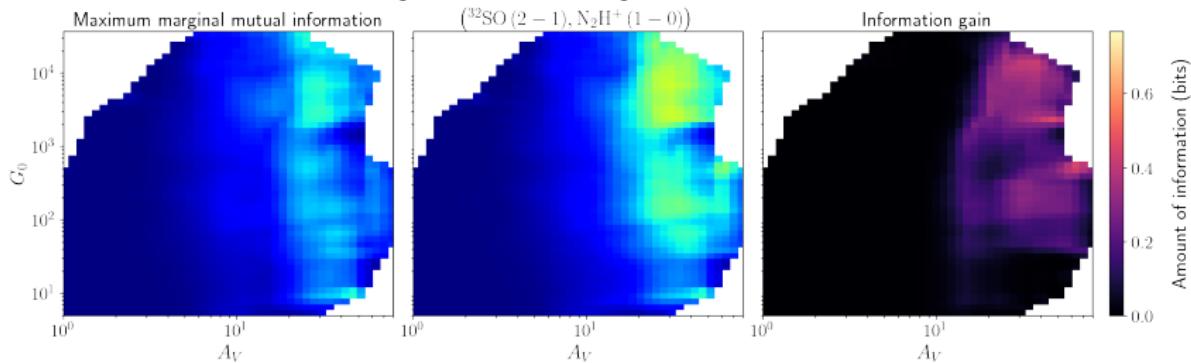

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{N}_2\text{H}^+ (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

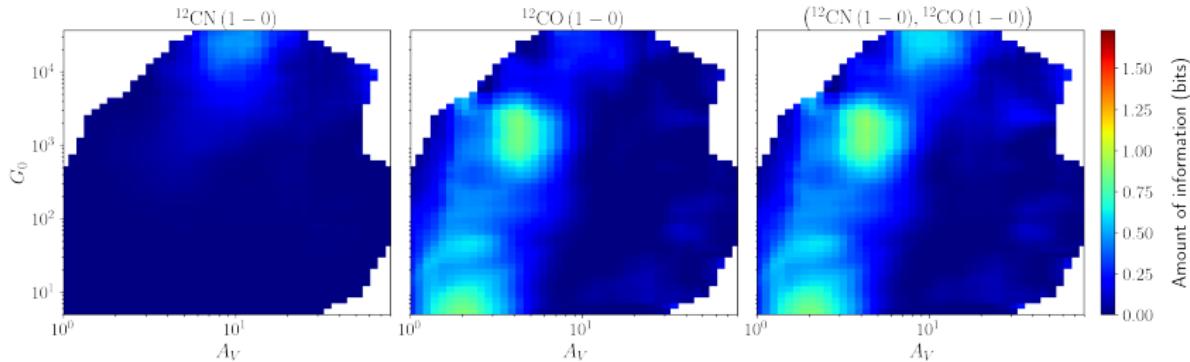

Outline

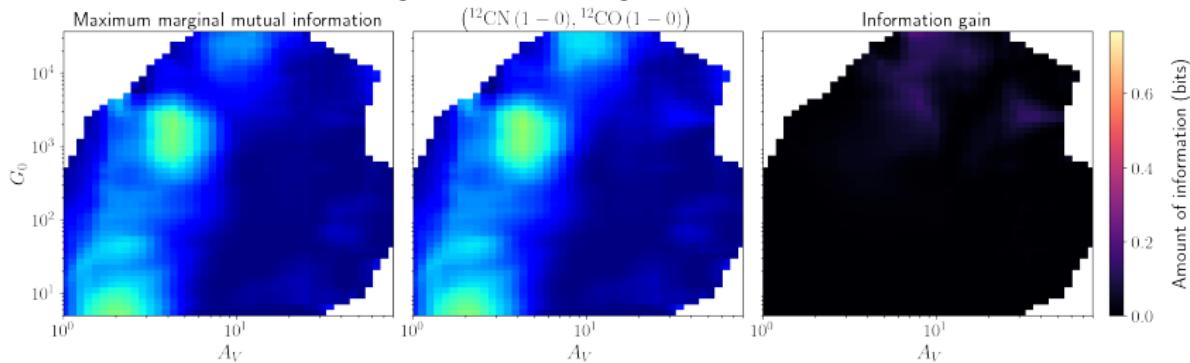

- 1 Combinations including ^{13}CO (1 – 0) (11 available)
- 2 Combinations including ^{12}CO (1 – 0) (11 available)

- 9 **Combinations including H_2CO (11 available)**
- 10 Combinations including ^{12}CS (2 – 1) (11 available)
- 11 Combinations including HCN (1 – 0) (11 available)
- 12 Combinations including HNC (1 – 0) (11 available)

Informativity on A_V of $(^{12}\text{CN}(1 - 0), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

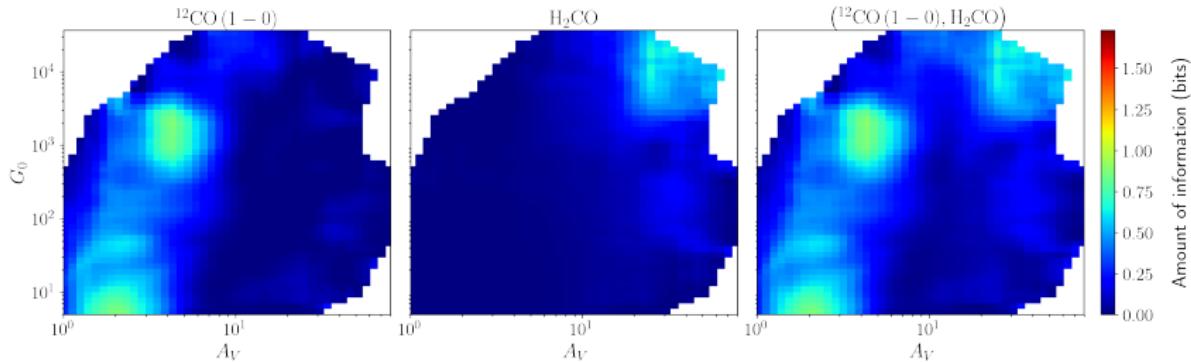

Information gain on A_V when knowing the combination of observables

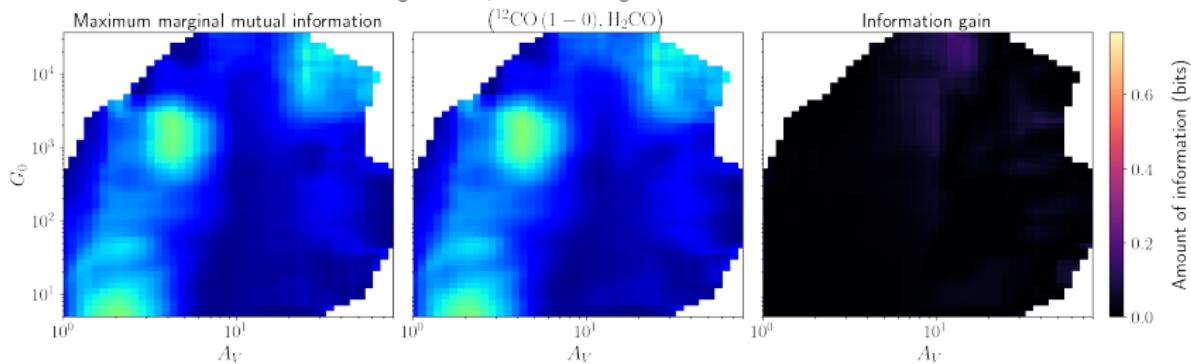

Informativity on A_V of $(^{12}\text{CO} (1 - 0), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

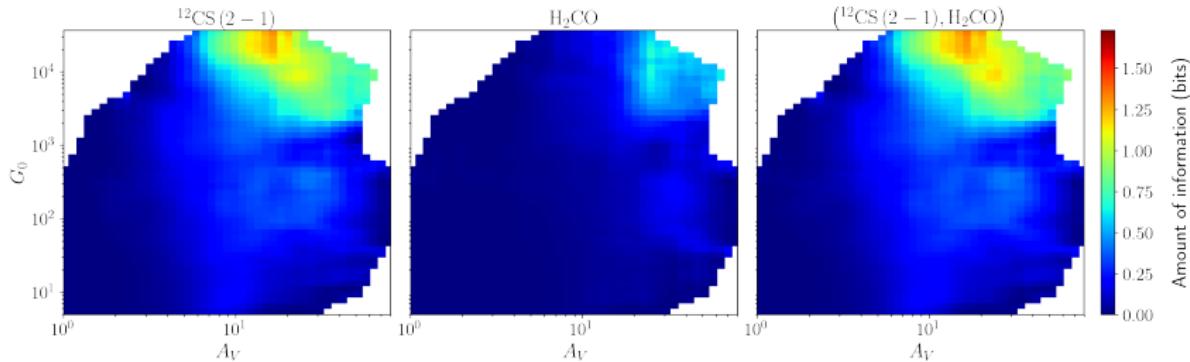

Information gain on A_V when knowing the combination of observables

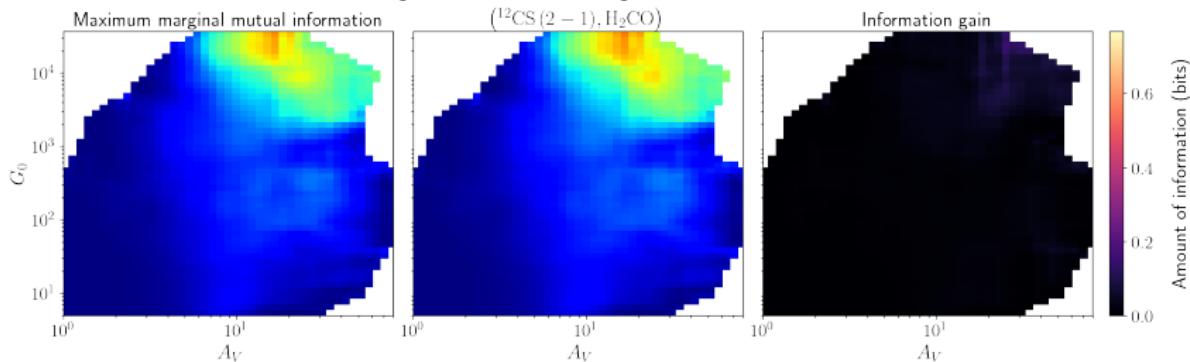

Informativity on A_V of $(^{12}\text{CS} (2 - 1), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

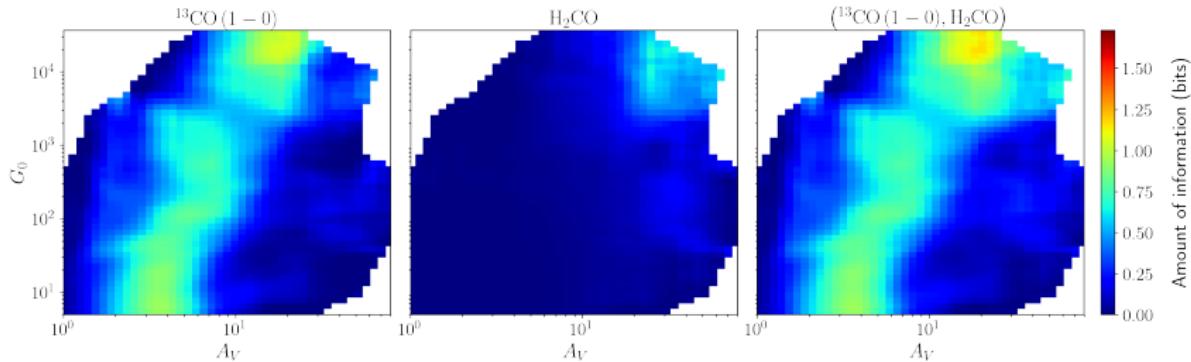

Information gain on A_V when knowing the combination of observables

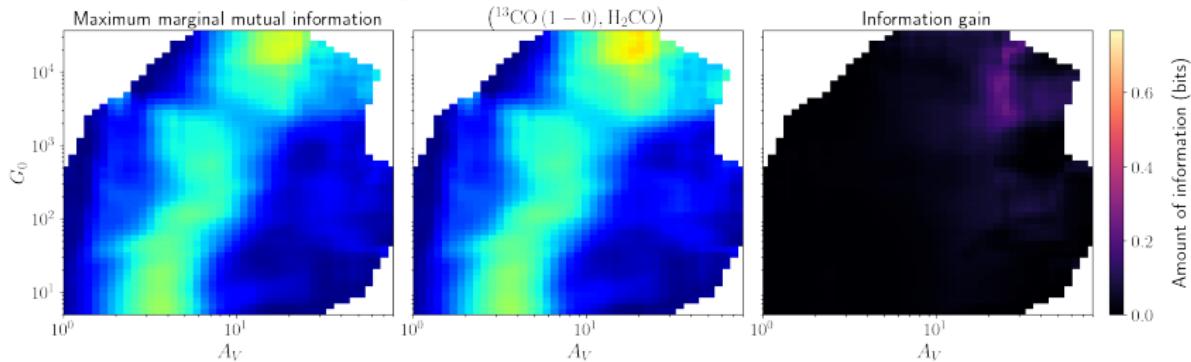

Informativity on A_V of $(^{13}\text{CO} (1 - 0), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

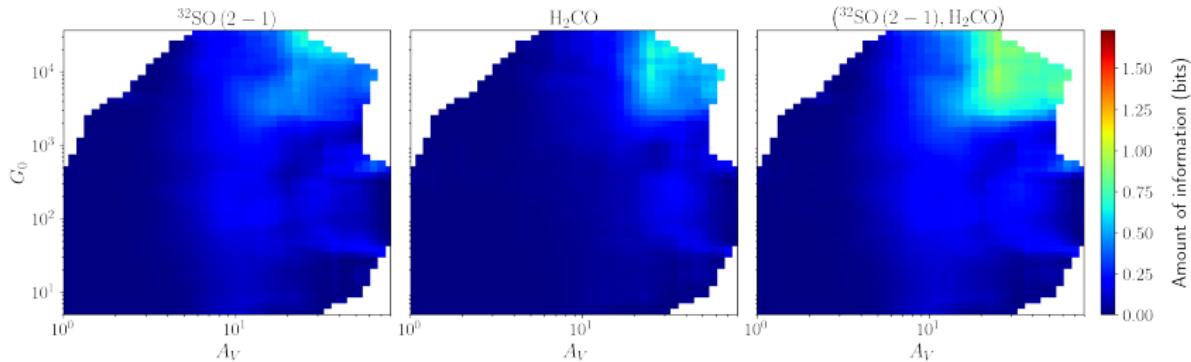

Information gain on A_V when knowing the combination of observables

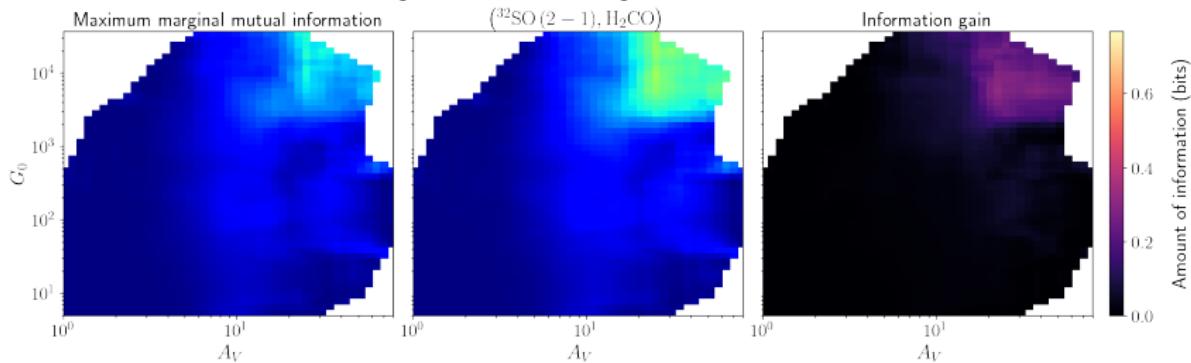

Informativity on A_V of $(^{32}\text{SO} (2 - 1), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

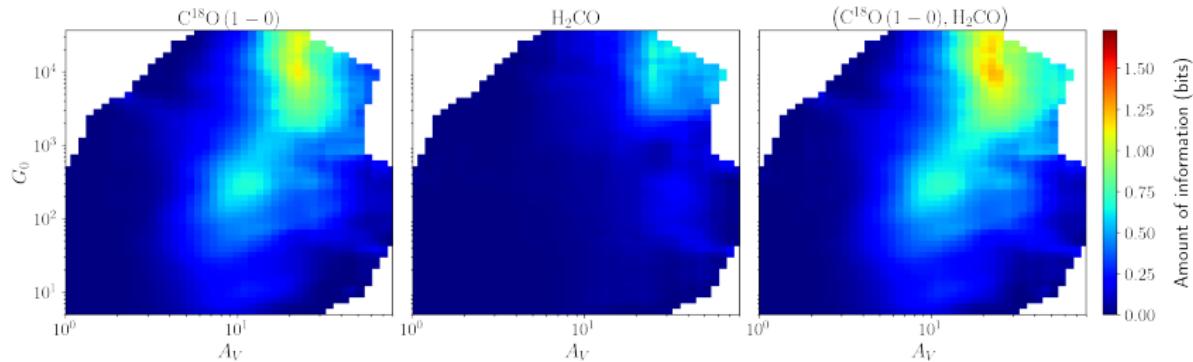

Information gain on A_V when knowing the combination of observables

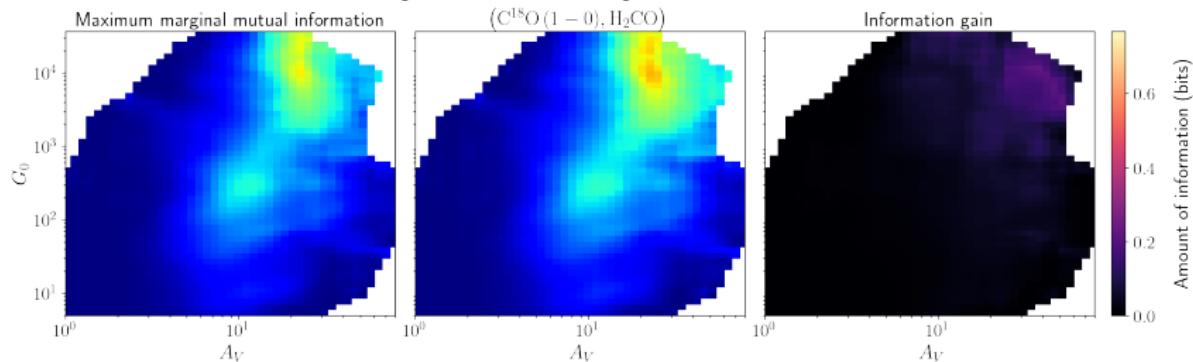

Informativity on A_V of $(C^{18}O(1 - 0), H_2CO)$

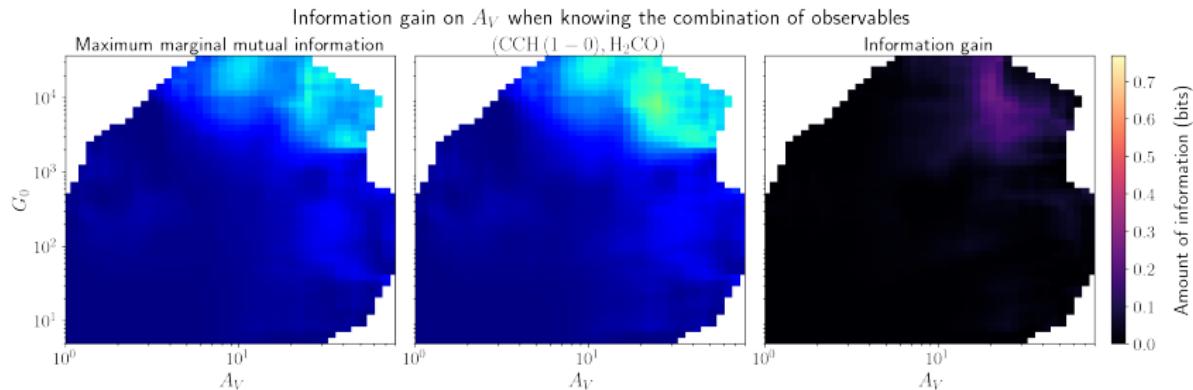

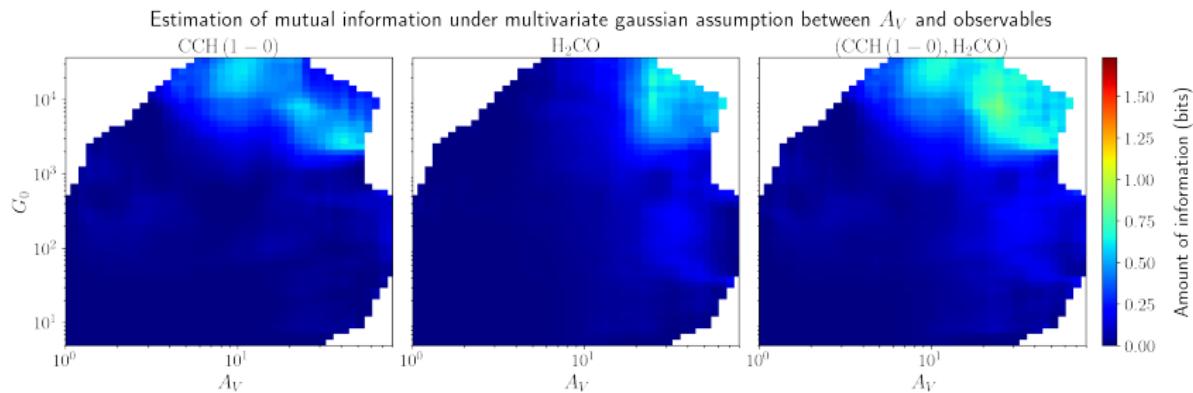

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

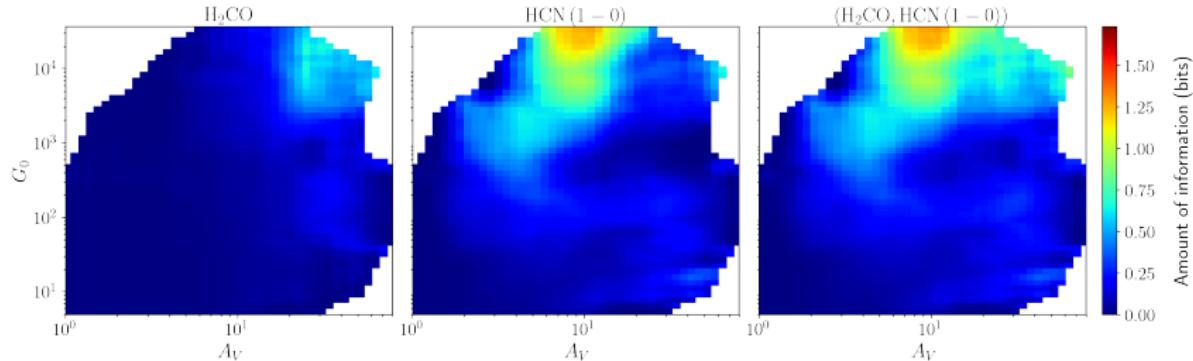

Informativity on A_V of $(\text{CCH}(1 - 0), \text{H}_2\text{CO})$

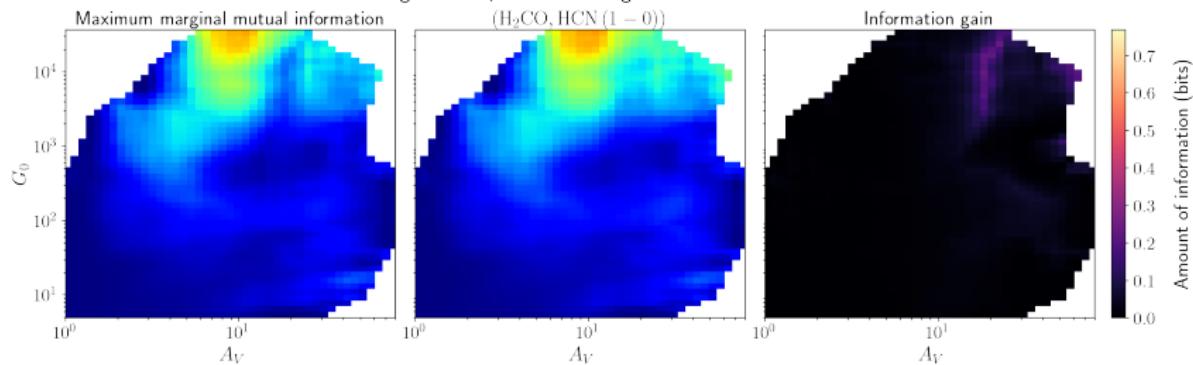

Informativity on A_V of (H_2CO , $\text{HCN} (1 - 0)$)

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

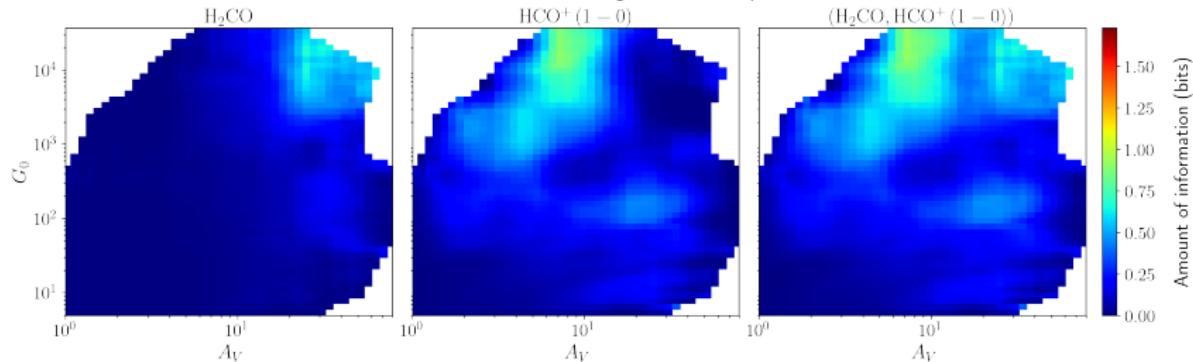

Information gain on A_V when knowing the combination of observables

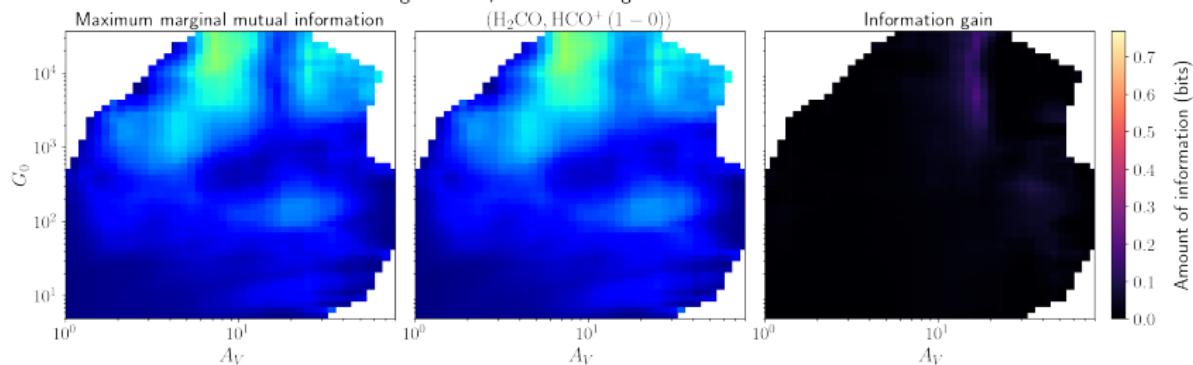

Informativity on A_V of (H_2CO , $\text{HCO}^+ (1 - 0)$)

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

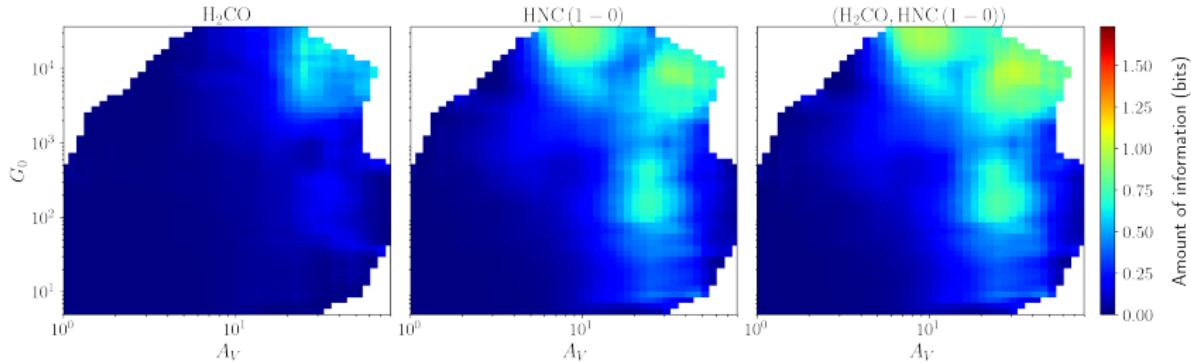

Information gain on A_V when knowing the combination of observables

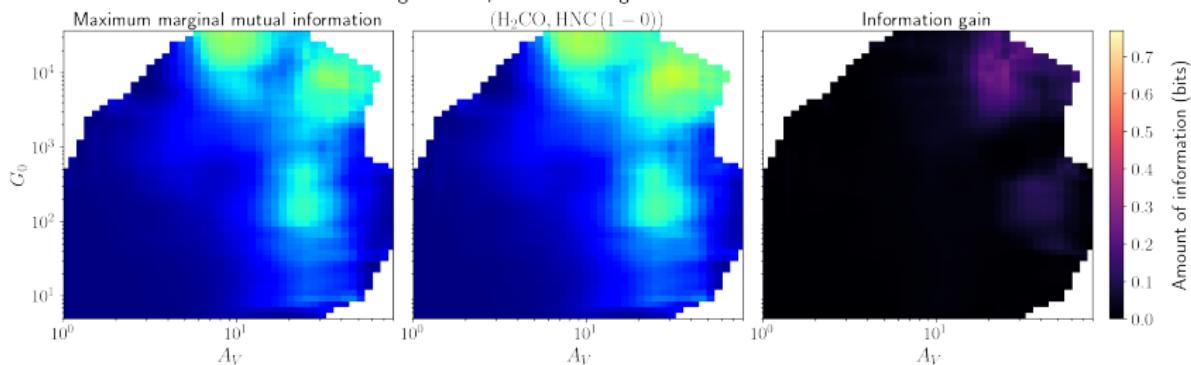

Informativity on A_V of (H_2CO , $\text{HNC}(1 - 0)$)

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

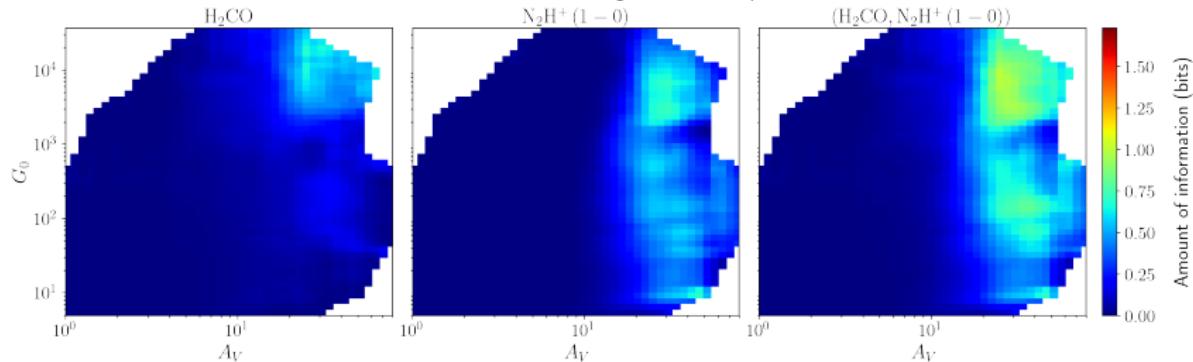

Information gain on A_V when knowing the combination of observables

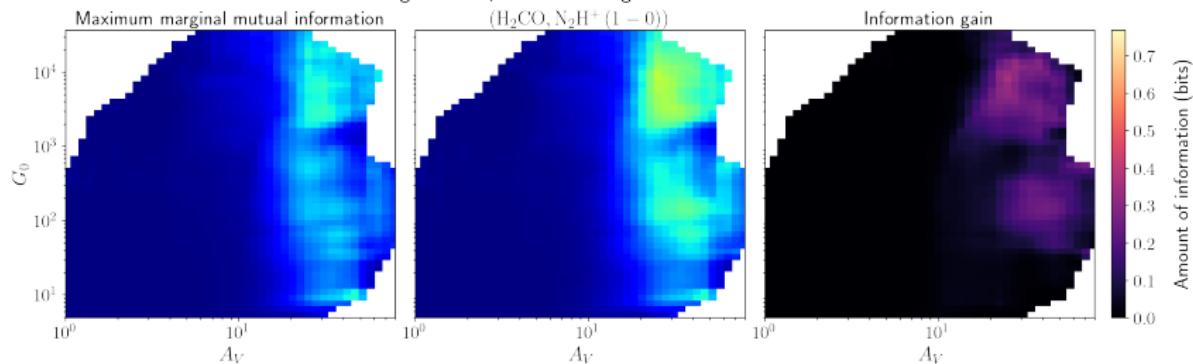

Informativity on A_V of (H_2CO , $\text{N}_2\text{H}^+ (1 - 0)$)

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables

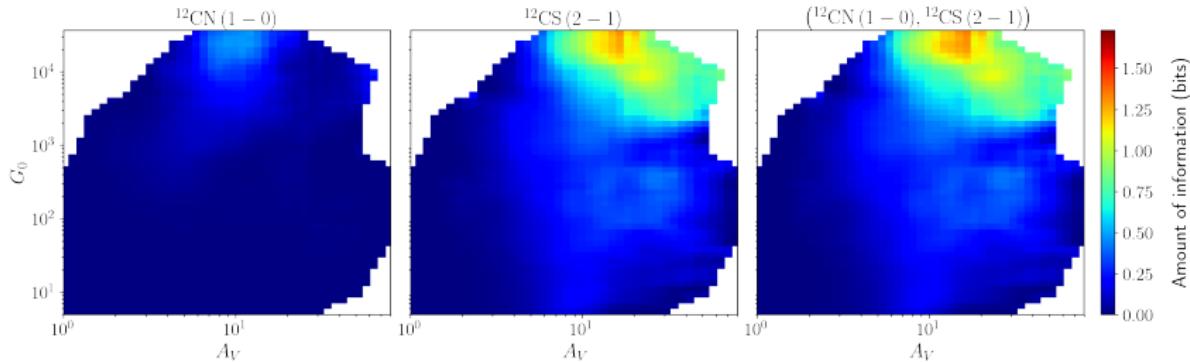

Outline

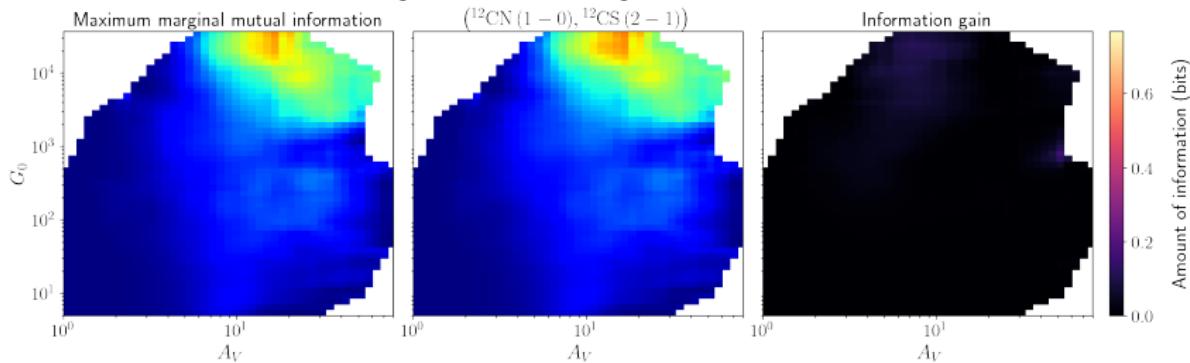

- 1 Combinations including ^{13}CO (1 – 0) (11 available)
- 2 Combinations including ^{12}CO (1 – 0) (11 available)
- 3 Combinations including C^{18}O (1 – 0) (11 available)
- 4 Combinations including ^{32}SO (2 – 1) (11 available)
- 5 Combinations including ^{12}CN (1 – 0) (11 available)
- 6 Combinations including N_2H^+ (1 – 0) (11 available)
- 7 Combinations including CCH (1 – 0) (11 available)
- 8 Combinations including HCO^+ (1 – 0) (11 available)
- 9 Combinations including H_2CO (11 available)
- 10 Combinations including ^{12}CS (2 – 1) (11 available)
- 11 Combinations including HCN (1 – 0) (11 available)
- 12 Combinations including HNC (1 – 0) (11 available)

Informativity on A_V of $(^{12}\text{CN}\,(1-0), ^{12}\text{CS}\,(2-1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

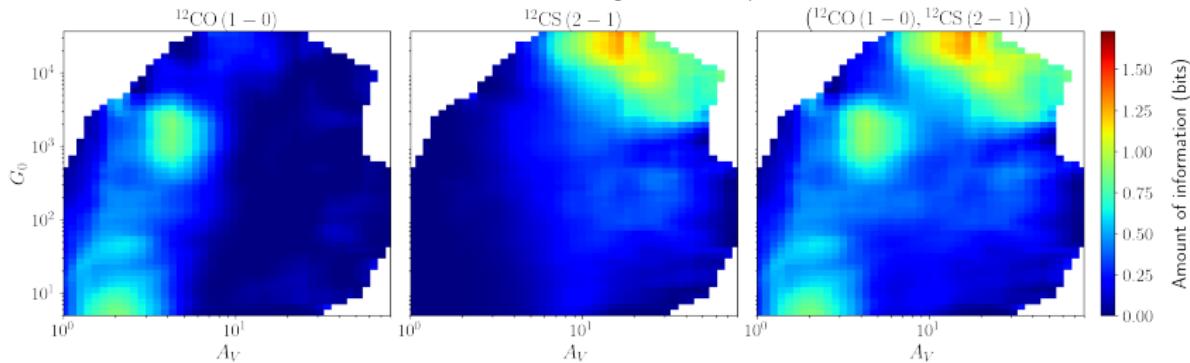

Information gain on A_V when knowing the combination of observables

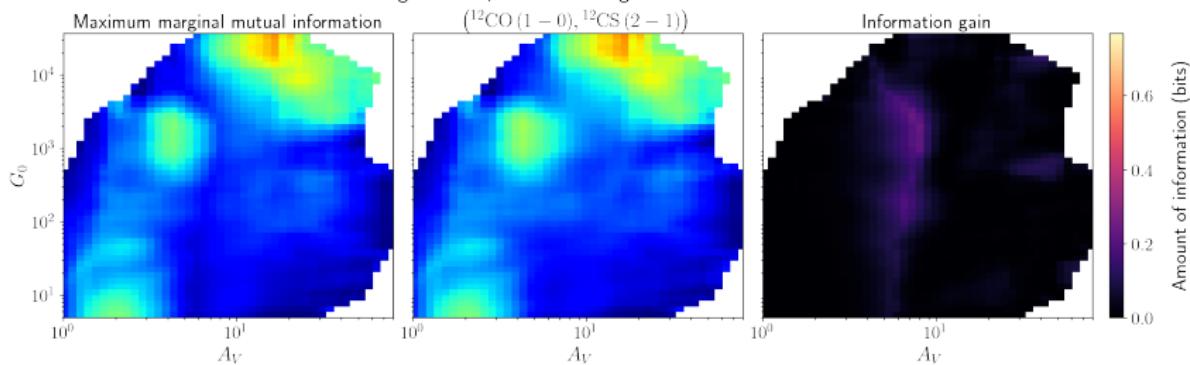

Informativity on A_V of $(^{12}\text{CO} (1 - 0), ^{12}\text{CS} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

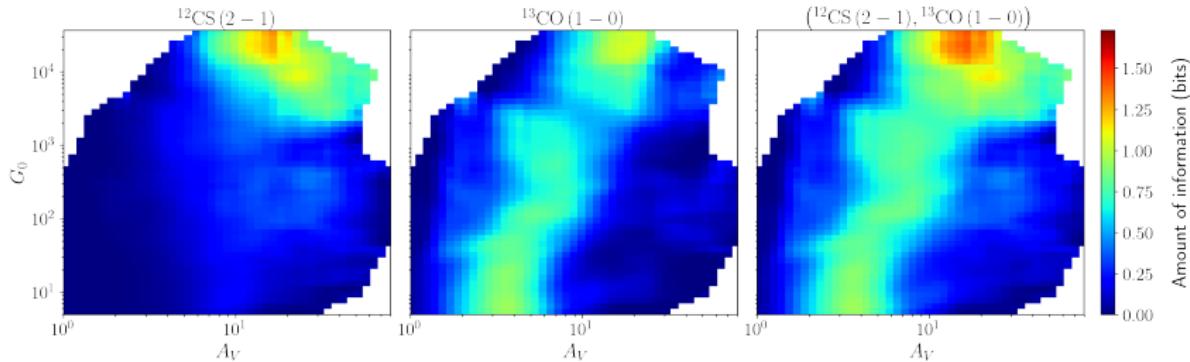

Information gain on A_V when knowing the combination of observables

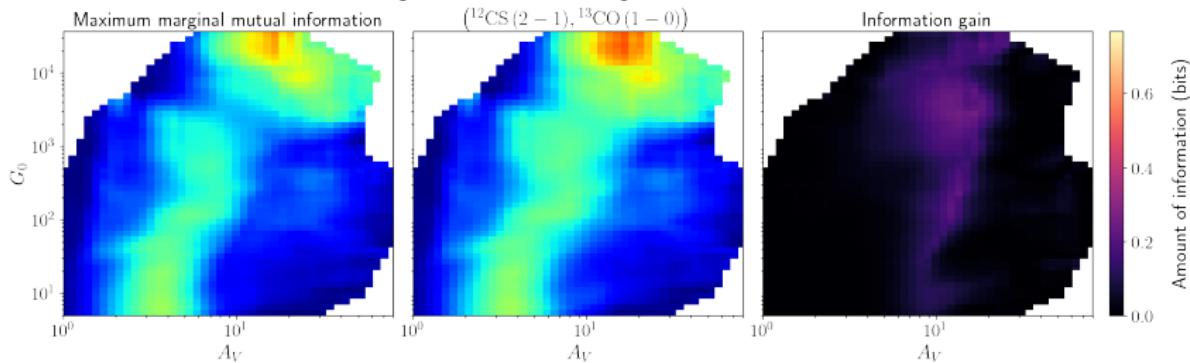

Informativity on A_V of $(^{12}\text{CS} (2 - 1), ^{13}\text{CO} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

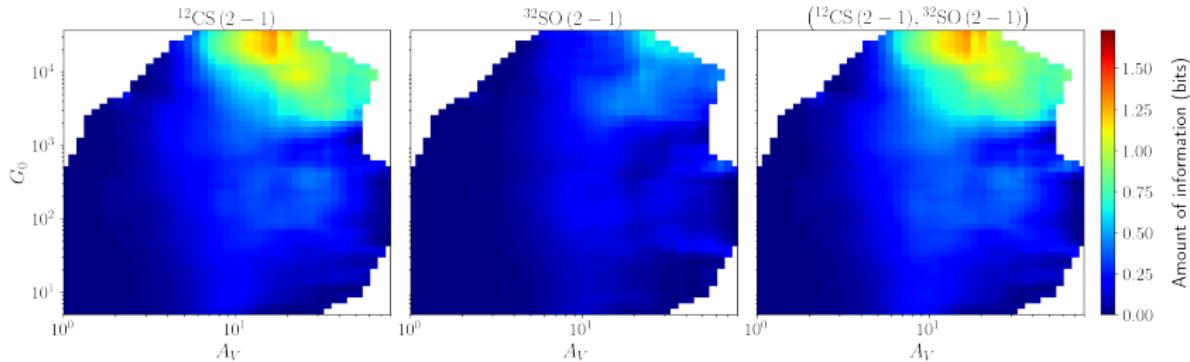

Information gain on A_V when knowing the combination of observables

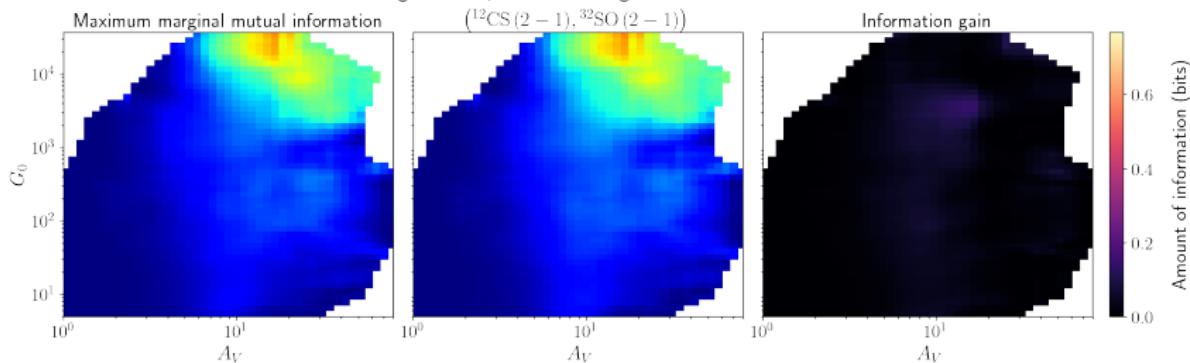

Informativity on A_V of $(^{12}\text{CS} (2 - 1), ^{32}\text{SO} (2 - 1))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

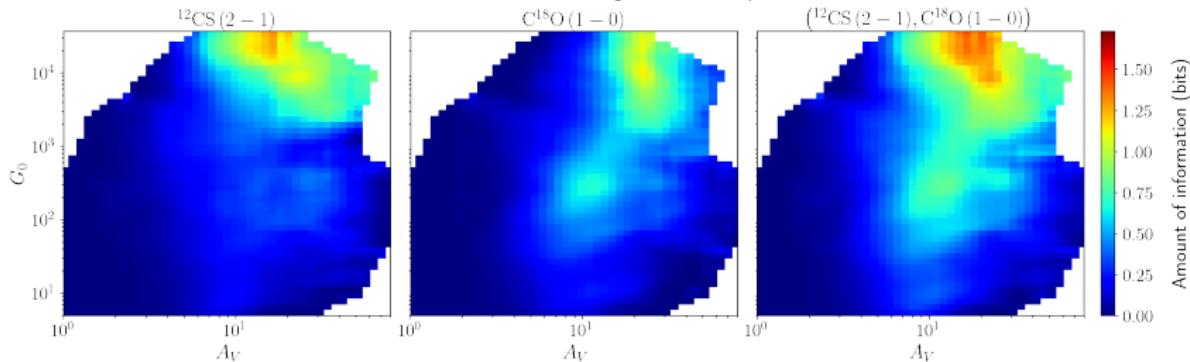

Information gain on A_V when knowing the combination of observables

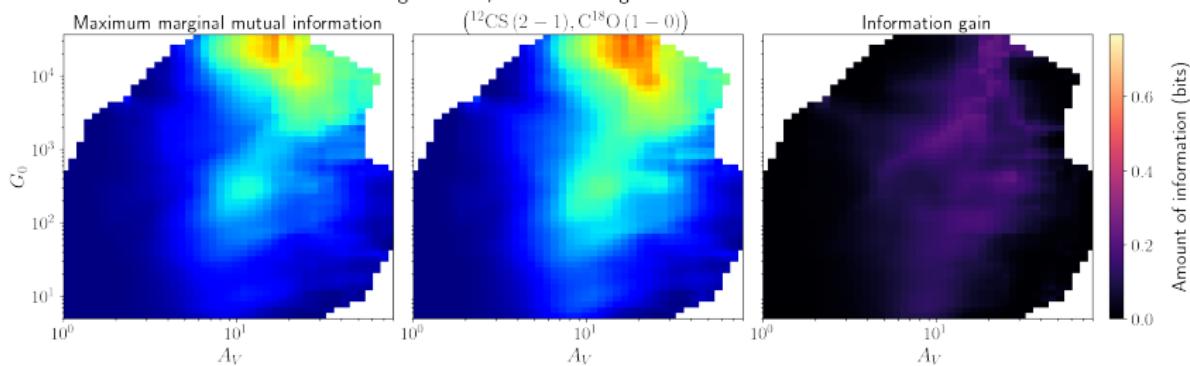

Informativity on A_V of $(^{12}\text{CS} (2 - 1), \text{C}^{18}\text{O} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

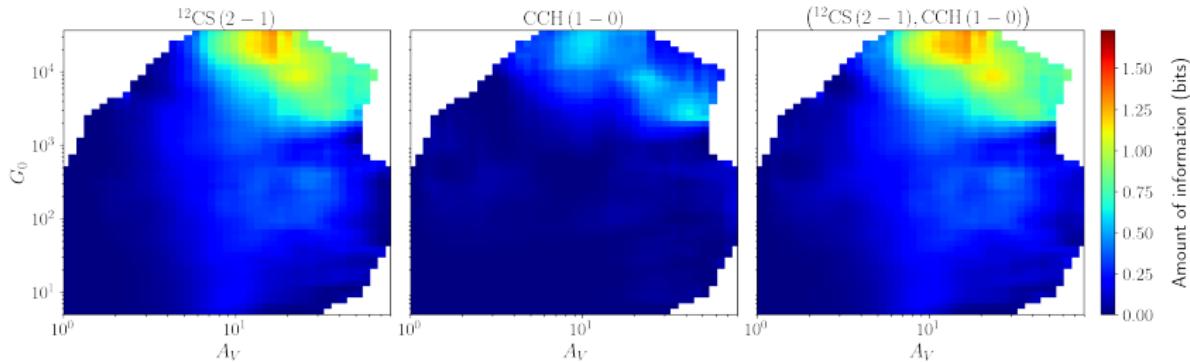

Information gain on A_V when knowing the combination of observables

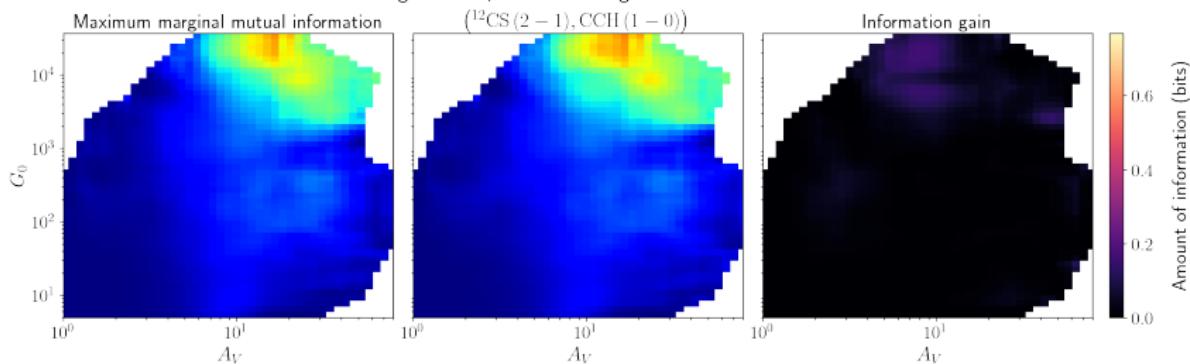

Informativity on A_V of $(^{12}\text{CS}(2 - 1), \text{CCH}(1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

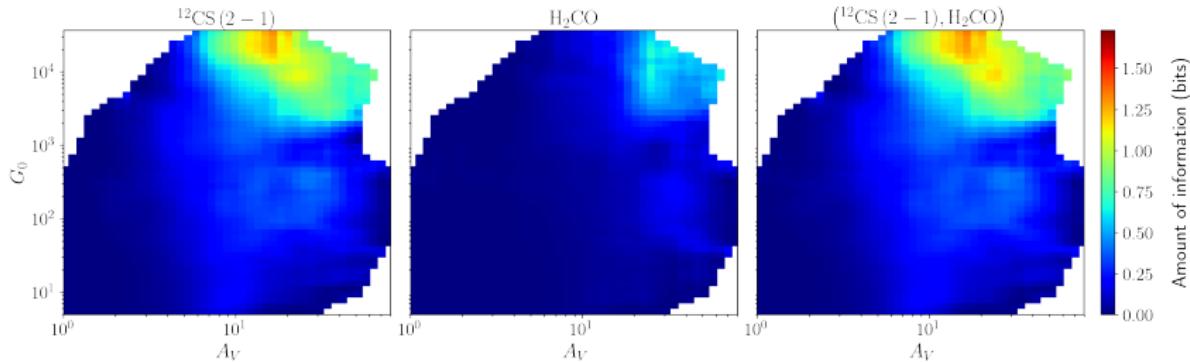

Information gain on A_V when knowing the combination of observables

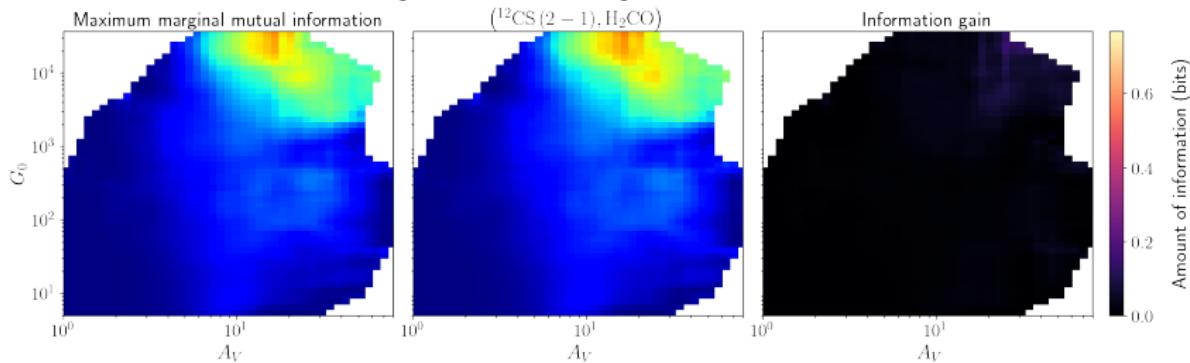

Informativity on A_V of $(^{12}\text{CS} (2 - 1), \text{H}_2\text{CO})$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

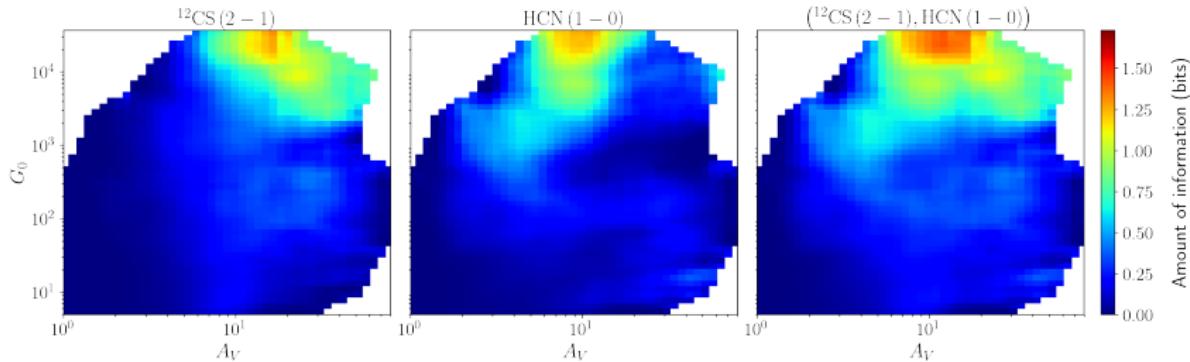

Information gain on A_V when knowing the combination of observables

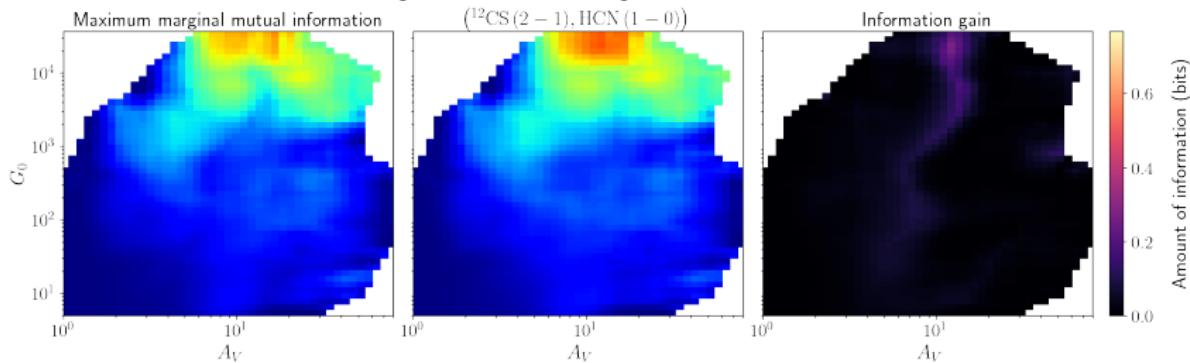

Informativity on A_V of $(^{12}\text{CS} (2 - 1), \text{HCN} (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

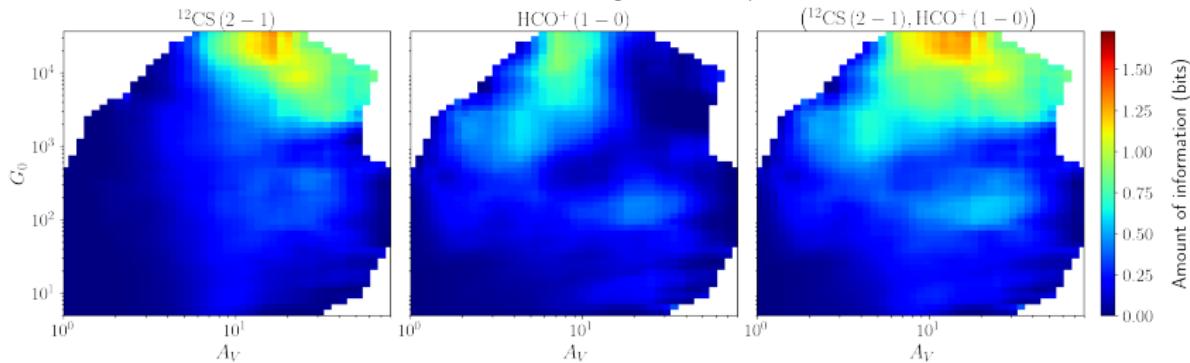

Information gain on A_V when knowing the combination of observables

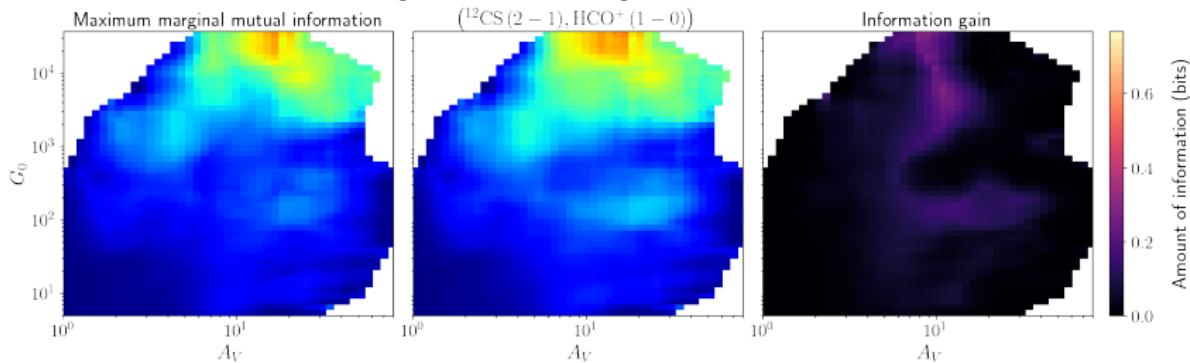

Informativity on A_V of $(^{12}\text{CS} (2 - 1), \text{HCO}^+ (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

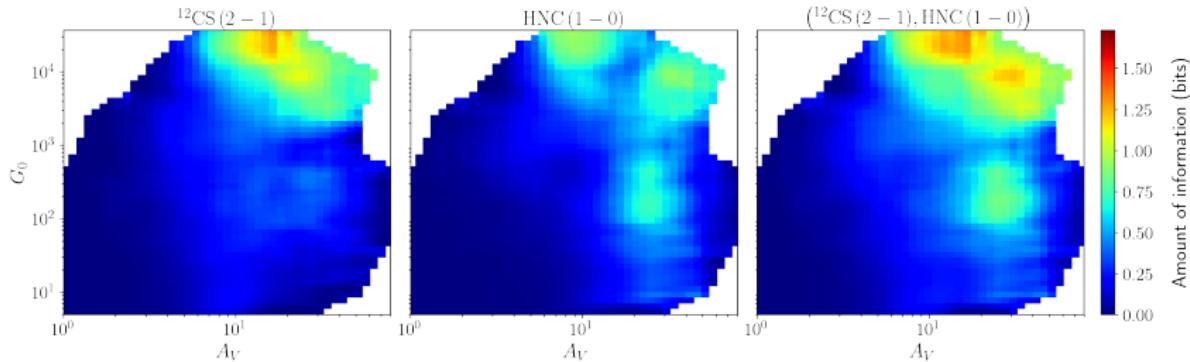

Information gain on A_V when knowing the combination of observables

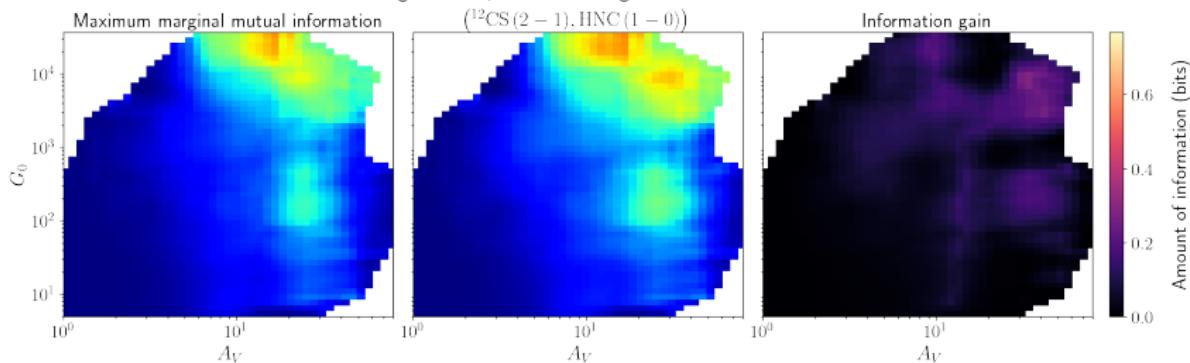

Informativity on A_V of $(^{12}\text{CS}(2 - 1), \text{HNC}(1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

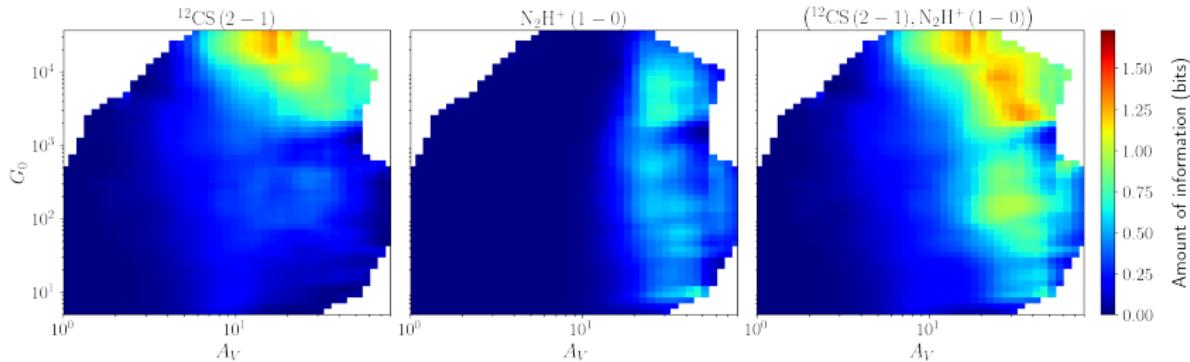

Information gain on A_V when knowing the combination of observables

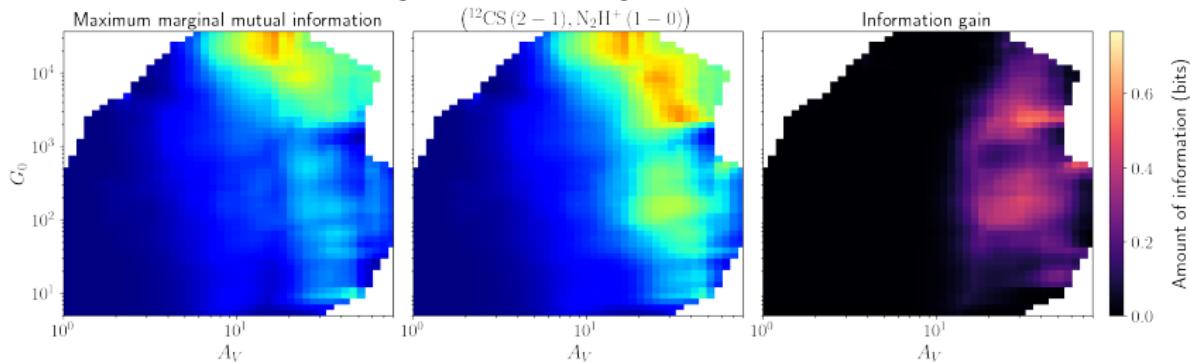

Informativity on A_V of $(^{12}\text{CS} (2 - 1), \text{N}_2\text{H}^+ (1 - 0))$

Estimation of mutual information under multivariate gaussian assumption between A_V and observables

Information gain on A_V when knowing the combination of observables
